## **Structure And Process In Southeastern Archaeology:**

**Structure and Process in Southeastern Archaeology** Roy S. Dickens Jr, H. Trawick Ward, 2002-05-14 Within the general structure and process theme of this compendium the authors have focused on either intrasite problems those dealing with the formation and structure of a site type of site or type of feature or intersite problems those dealing with behavioral organization and process as developed from comparative site data These papers from a broad range of specialists present a comprehensive study of southeastern archaeology

**Trends and Traditions in Southeastern Zooarchaeology** Tanya M. Peres, 2014-02-25 While most works of southeastern archaeology focus on stone artifacts or ceramics this volume is the first to bring together past and current trends in zooarchaeological studies Faunal reports are often relegated to appendices and not synthesized with the rest of the archaeological data but Trends and Traditions in Southeastern Zooarchaeology calls attention to the diversity of information that faunal remains can reveal about rituals ideologies socio economic organization trade and past environments These essays by leading practitioners in this developing field highlight the differences between the archaeological focus on animals as the food source of their time and the belief among zooarchaeologists that animals represent a far more complex ecology With broad methodological and interpretive analysis of sites throughout the region the essays range in topic from the enduring symbolism of shells for more than 5 000 years to the domesticated dog cemeteries of Spirit Hill in Jackson County Alabama and to the subsistence strategies of Confederate soldiers at the Florence Stockade in South Carolina Ultimately challenging traditional concepts of the roles animals have played in the social and economic development of southeastern cultures this book is a groundbreaking and seminal archaeological study

Early and Middle Woodland Landscapes of the Southeast Alice P. Wright, Edward R. Henry, 2019-10-01 Fourteen in depth case studies incorporate empirical data with theoretical concepts such as ritual aggregation and place making highlighting the variability and common themes in the relationships between people landscapes and the built environment that characterize this period of North American native life in the Southeast

Handbook of Landscape Archaeology Bruno David, Julian Thomas, 2016-06-03 Over 80 archaeologists from four continents create a benchmark volume of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework

*Archaeology of the Appalachian Highlands* Lynne P. Sullivan, Susan C. Prezzano, 2001 This volume is a major synthesis of the archaeology of the Appalachian region and includes much material that was previously unpublished or underpublished The information and interpretations presented will be very useful for archaeologists working in eastern North America who are interested in this diverse region

C Clifford Boyd Jr Radford University Archaeology of the Appalachian Highlands reveals that every part of Appalachia yields archaeological evidence significant to understanding the broad prehistoric sweep of the American Indians In this most welcome volume editors Lynn Sullivan and Susan Prezzano have assembled the most current interpretations of archaeological theory technology and cultural history as these occur in

the highlands of eastern North America This volume to shatter myths about Appalachian and its past David S Brose Director Schiele Museum of Natural History     **A History of Platform Mound Ceremonialism** Megan C. Kassabaum, 2021-05-04 This book presents a temporally and geographically broad yet detailed history of an important form of Native American architecture the platform mound revealing unexpected continuities in moundbuilding over many thousands of years     **The Archaeology of Villages in Eastern North America** Jennifer Birch, Victor D. Thompson, 2018-09-17 This volume highlights the similarities and differences in the historical trajectories of village formation and development in eastern North America as well as the larger processes by which villages have the power to affect large scale social transformations Contributors to this volume employ archaeological and historical evidence to explore the development of villages among eastern North American societies of the deep and recent past     **North American Projectile Points - Revised** Wm Jack Hranicky Rpa, 2010-06     **Stone Age Spear and Arrow Points of the Midcontinental and Eastern United States** Noel D. Justice, 1987 This is an important new reference work for the professional archaeologist as well as the student and collector Central States Archaeological Journal Justice admirably synthesizes the scientific information integrating it with the popular approach The result is a publication that readers on both sides of the spectrum should enjoy as well as comprehend Choice an indispensable guide to the literature Attractive layout design and printing accent the useful text it should remain the standard reference on point typology of the midwest and eastern United States for many years to come Pennsylvania Archaeologist Archaeologists and amateur collectors alike will rejoice at this important reference work that surveys describes and categorizes the projectile points and cutting tools used in prehistory by the Indians in what are now the middle and eastern sections of the United States from 12 000 B C to the beginning of the historic period Mr Justice describes over 120 separate types of stone arrowheads and spear points according to period culture and region His detailed drawings show how Native Americans shaped their tools what styles were peculiar to which regions and how the various types can best be identified There are over 485 drawings organized by type cluster and other identifying characteristics The work also includes distribution maps and 111 examples in color     **Archaeological Theory Today** Ian Hodder, 2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume increasingly see links and convergences between their perspectives The volume also reflects archaeology's new openness to

external influences as well as the desire to contribute to wider debates The contributors examine ways in which archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of Archaeological Theory Today will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally
