Institute of Metals, 1928 Issues for Sept 1951 include the Bulletin *Metal Shaping Processes* Vukota Boljanovic, 2010 As
the only comprehensive text focusing on metal shaping processes which are still the most widely used processes in the
manufacture of products and structures *Metal Shaping Processes* carefully presents the fundamentals of metal shaping
processes with their relevant applications The treatment of the subject matter is adequately descriptive for those unfamiliar
with the various processes and yet is sufficiently analytical for an introductory academic course in manufacturing The text as
well as the numerous formulas and illustrations in each chapter clearly show that shaping processes as a part of
manufacturing engineering are a complex and interdisciplinary subject The topics are organized and presented in such a
manner that they motivate and challenge students to present technically and economically viable solutions to a wide variety
of questions and problems including product design It is the perfect textbook for students in mechanical industrial and
manufacturing engineering programs at both the Associate Degree and Bachelor Degree programs as well a valuable
reference for manufacturing engineers those who design execute and maintain the equipment and tools process engineers
those who plan and engineer the manufacturing steps equipment and tooling needed in production manufacturing managers
and supervisors product design engineers and maintenance and reliability managers and technicians Features Each chapter
begins with a brief highlighted outline of the topics to be described Carefully presents the fundamentals of the particular
metal shaping process with its relevant applications within each chapter so that the student and teacher can clearly assess
the capabilities limitation and potentials of the process and its competitive aspects Features sections on product design
considerations which present guidelines on design for manufacturing in many of the chapters Offers practical understandable
explanations even for complex processes Includes text entries that are coded as in an outline with these numerical
designations carried over the 320 related illustrations for easy cross referencing Provides a dual ISO and USA unit system
Contains end of chapter Review Questions Includes a chapter on sheet metalworking covering cutting processes bending
process tubes and pipe bending deep drawing processes other sheet metal forming process stretch forming spinning rubber
