Structure Reports For 1965 Volume 30a:

Structure Reports for 1965, Volume 30A W.B. Pearson, H.W. King, J. Trotter, 2014-09-12 Starting with Volume 30 1965 Structure Reports is produced in a new format by photo offset printing from typed manuscript with unjustified lines At the time when the decision for this change was taken the cost of setting the manuscript in type was becoming so high as to render the cost of individual subscription prohibitive At that time automatic typing methods giving justified lines etc for photo offset reproduction did not offer any saving over type setting but hand typing of the manuscripts could give a considerable saving in production costs In the belief that a publication that is too expensive to buy is of little value the format has been changed sacrificing elegance to availability The new format does not lead to increased length of the volumes since the information content of the typed and typeset pages is practically identical However the amount of work to be reported demands the eventual separation of Structure Reports into two volumes A Metals and Inorganic and B Organic It was convenient to introduce this change also at Volume 30 and with Volume 31 further to restrict the publication of crystal data so that from 1966 onwards the reports deal almost entirely with complete structure determinations only In the past the aim of Structure Reports has been to present critical reports on all work of crystallographic structural interest whether it is derived directly from X ray electron or neutron diffraction or even indirectly from other experiments Structure Reports for 1985, Volume 52A G.
