Structured Meanings The Semantics Of Propositional Attitudes:

Structured Meanings M. J. Cresswell, 1985 M J Cresswell is a logician and philosopher of language who has been a major continuing influence on the growth and development of formal semantics over the past 15 years or more This book is the outgrowth of years of work on propositional attitudes the hardest problem in semantics In it he traces the problem to the foundations of semantics and solves it by distinguishing between the result of the composition of the simple parts of complex expressions and structure consisting of the uncomposed parts Cresswell explains the basis of the great intuitive appeal of structured meanings and why previous attempts from Carnap s notion of intensional isomorphism on to use them to solve the propositional attitudes problem have been unsuccessful His own formalization is integrated into a model theoretic framework which is capable of incorporating and extending all the insights obtained from Montague s semantics M J Cresswell is Professor of Philosophy Victoria University of Wellington New Zealand He is the author of *Logics and Languages* in which he developed an alternative version of Montague Grammar as well as many articles on possible worlds semantics and coauthor with G E Hughes of *An Introduction to Modal Logic* and *A Companion to Modal Logic* the standard works in the field A Bradford Book *On the Semantics of Propositional Attitude Reports* Mats Dahllöf, 1995 *The Semantics of Media* J. Ross, 2012-12-06 Media are objects with content and character that we describe using in phrases in the story in the picture in the movie in the dream Like the propositional attitudes these objects present a variety of hard problems for semantic and philosophical analysis *The Semantics of Media* is an organized exploration of fundamental questions in the semantics of media The first three chapters set out a straightforward model within the possible worlds framework and consider how it might account for a range of notions applying to media generally implicit vs explicit content propositional vs individual content causal vs intentional content and the idea of a single World of the Medium The final three chapters examine ways of elaborating the model to cover a range of phenomena keyed to the functionality of particular forms of media Chapter Four is a discussion of fiction and our apparent reference to fictional characters Chapter Five deals with the phenomenon of viewpoint in pictorial media Chapter Six is a study of interactions between users and characters of media centering on the puzzling case of seeing in films *The Semantics of Media* will be of interest to specialists in the fields of linguistics philosophy and communications *A Companion to David Lewis* Barry Loewer, Jonathan Schaffer, 2015-02-10 In *A Companion to David Lewis* Barry Loewer and Jonathan Schaffer bring together top philosophers to explain discuss and critically extend Lewis s seminal work in original ways Students and scholars will discover the underlying themes and complex interconnections woven through the diverse range of his work in metaphysics philosophy of language logic epistemology philosophy of science philosophy of mind ethics and aesthetics The first and only comprehensive study of the work of David Lewis one of the most systematic and influential philosophers of the latter half of the 20th century Contributions shed light on the underlying themes and complex interconnections woven through Lewis s work across his enormous range of influence including

metaphysics language logic epistemology science mind ethics and aesthetics Outstanding Lewis scholars and leading philosophers working in the fields Lewis influenced explain discuss and critically extend Lewis s work in original ways An essential resource for students and researchers across analytic philosophy that covers the major themes of Lewis s work

The Symbolic and Connectionist Paradigms John Dinsmore,2014-01-14 The modern study of cognition finds itself with two widely endorsed but seemingly incongruous theoretical paradigms The first of these inspired by formal logic and the digital computer sees reasoning in the principled manipulation of structured symbolic representations The second inspired by the physiology of the brain sees reasoning as the behavior that emerges from the direct interactions found in large networks of simple processing components Each paradigm has its own accomplishments problems methodology proponents and agenda This book records the thoughts of researchers from both computer science and philosophy on resolving the debate between the symbolic and connectionist paradigms It addresses theoretical and methodological issues throughout but at the same time exhibits the current attempts of practicing cognitive scientists to solve real problems *Handbook of*

Philosophical Logic Dov M. Gabbay,Franz Guentner,2012-12-06 conceptual realist theories of predication Chapter IV 4 centers on an important class of expressions used for predication in connection with quantities mass expressions This chapter reviews the most well known approaches to mass terms and the ontological proposals related to them In addition to quantification and predication matters of reference have constituted the other overriding theme for semantic theories in both philosophical logic and the semantics of natural languages Chapter IV 5 of how the semantics of proper names and descriptions presents an overview tions have been dealt with in recent theories of reference Chapter IV 6 is concerned with the context dependence of reference in particular with the semantics of indexical expressions The topic of Chapter IV 7 is related to predication as it surveys some of the central problems of ascribing propositional attitudes to agents Chapter IV 8 deals with the analysis of the main temporal aspects of natural language utterances Together these two chapters give a good indication of the intricate complexities that arise once modalities of one or the other sort enter on the semantic stage in philosophical Chapter IV 9 deals with another well known topic logic presupposition an issue on the borderline of semantics and pragmatics The volume closes with an extensive study of the Liar paradox and its many implications for the study of language as for example self reference truth concepts and truth definitions

Montague Pieter A. M. Seuren,2013-10-03 This book explores the relations between language the world the minds of individual speakers and the collective minds of particular language communities Pieter Seuren examines the status of abstract rule systems underlying speech and considers how much computational power may be attributed to the human mind The book opens with chapters on the social reality of language the ancient question of the primacy of language or thought

and the relation between universal and language specific features Professor Seuren then considers links between language logic and mathematics he suggests the facts of language require a theory with abstract principles and that grammars should be seen as mediating between propositionally structured thoughts and systems such as speech for the production of utterances He argues that grammars are neither autonomous nor independent of meaning He concludes by considering how a fundamental rephrasing of the basic principles of logic could reconnect it with cognition and language and involve a principled rejection of possible world semantics

Content, Cognition, and Communication Nathan Salmon, 2007-03-29

Nathan Salmon presents a selection of nineteen of his essays from the early 1980s to 2006 on a set of closely connected topics central to analytic philosophy The book is divided into four thematic sections on direct reference apriority belief and the distinction between semantics and pragmatics

Meaning and Structure Jaroslav Peregrin, 2017-03-02 In Meaning and Structure Peregrin argues that recent and contemporary post analytic philosophy as developed by Quine Davidson Sellars and their followers is largely structuralistic in the very sense in which structuralism was originally tabled by Ferdinand de Saussure The author reconstructs de Saussure's view of language linking it to modern formal logic and mathematics and reveals close analogies between its constitutive principles and the principles informing the holistic and neopragmatistic view of language put forward by Quine and his followers Peregrin also indicates how this view of language can be made compatible with what is usually called formal semantics Drawing on both the Saussurean tradition and recent developments in analytic philosophy of language this book offers a unique study of the ways in which the concept of meaning can be seen as consisting in the concept of structure

The Top Books of the Year Structured Meanings The Semantics Of Propositional Attitudes The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have charmed audiences this year.

Structured Meanings The Semantics Of Propositional Attitudes : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail.

Structured Meanings The Semantics Of Propositional Attitudes : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery.

Discover the Magic : Delia Owens' "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting.

These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a brilliant and gripping novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
