Stable Categories and Structured Ring Spectra Andrew J. Blumberg, Teena Gerhardt, Michael A. Hill, 2022-07-21 A graduate level introduction to the homotopical technology in use at the forefront of modern algebraic topology

Structured Ring Spectra Andrew Baker, Birgit Richter, 2004 Within algebraic topology the prominent role of multiplicative cohomology theories has led to a great deal of foundational research on ring spectra and in the 1990s this gave rise to significant new approaches to constructing categories of spectra and ring like objects in them This book contains some important new contributions to the theory of structured ring spectra as well as survey papers describing these and relationships between them One important aspect is the study of strict multiplicative structures on spectra and the development of obstruction theories to imposing strictly associative and commutative ring structures on spectra A different topic is the transfer of classical algebraic methods and ideas such as Morita theory to the world of stable homotopy

Galois Extensions of Structured Ring Spectra/Stably Dualizable Groups John Rognes, 2008 The author introduces the notion of a Galois extension of commutative S algebras E_∞ ring spectra often localized with respect to a fixed homology theory There are numerous examples including some involving Eilenberg Mac Lane spectra of commutative rings real and complex topological K theory Lubin Tate spectra and cochain S algebras He establishes the main theorem of Galois theory in this generality Its proof involves the notions of separable and étale extensions of commutative S algebras and the Goerss Hopkins Miller theory for E_∞ mapping spaces He shows that the global sphere spectrum S is separably closed using Minkowski's discriminant theorem and he estimates the separable closure of its localization with respect to each of the Morava K theories He also defines Hopf Galois extensions of commutative S algebras and studies the complex cobordism spectrum MU as a common integral model for all of the local Lubin Tate Galois extensions The author extends the duality theory for topological groups from the classical theory for compact Lie groups via the topological study by J R Klein and the p complete study for p compact groups by T Bauer to a general duality theory for stably dualizable groups in the E local stable homotopy category for any spectrum E

Global Homotopy Theory Stefan Schwede, 2018-09-06 A comprehensive self contained approach to global equivariant homotopy theory with many detailed examples and sample calculations

Rings, Modules, and Algebras in Stable Homotopy Theory Anthony D. Elmendorf, 1997 This book introduces a new point set level approach to stable homotopy theory that has already had many applications and promises to have a lasting impact on the subject Given the sphere spectrum S the authors construct an associative commutative and unital smash product in a complete and cocomplete category of S modules whose derived category is equivalent to the classical stable homotopy category This construction allows for a simple and algebraically manageable definition of S algebras and commutative S algebras in terms of associative or associative and commutative products $R \wedge SR \rightarrowtail R$ These notions are essentially equivalent to the earlier notions of A -infty and E -infty ring spectra and the older notions feed naturally into the new framework to provide plentiful examples There is an equally simple definition of R modules in terms of maps $R \wedge SM \rightarrowtail M$ When R is commutative the category of R modules also has a

Women in Topology Maria Basterra, Kristine Bauer, Kathryn Hess, Brenda Johnson, 2015-05-21 This volume contains the proceedings of the WIT Women in Topology workshop held from August 18-23, 2013 at the Banff International Research Station Banff Alberta Canada The Women in Topology workshop was devoted primarily to active collaboration by teams of five to seven participants each including senior and junior researchers as well as graduate students This volume contains papers based on the results obtained by team projects in homotopy theory including infinity structures equivariant homotopy theory functor calculus model categories orbispaces and topological Hochschild homology

This is likewise one of the factors by obtaining the soft documents of this **Structured Ring Spectra** by online. You might not require more grow old to spend to go to the books launch as with ease as search for them. In some cases, you likewise realize not discover the publication Structured Ring Spectra that you are looking for. It will very squander the time.

However below, in the same way as you visit this web page, it will be correspondingly categorically simple to acquire as skillfully as download lead Structured Ring Spectra

It will not acknowledge many become old as we tell before. You can accomplish it even if perform something else at house and even in your workplace. so easy! So, are you question? Just exercise just what we allow below as well as evaluation **Structured Ring Spectra** what you past to read!
