Nuclear Magnetic Resonance in Agriculture Philip E. Pfeffer, Walter V. Gerasimowicz, 1989-04-30 This informative publication presents the broad application of nuclear magnetic resonance to many of today's problem areas in agriculture. Solid state NMR methodology is covered with its applications to the study of intact agricultural matrices such as plant cell walls, photosynthetic chloroplast membranes, forages, wood, cellulose, and soils. In vivo solution NMR methodology and its applications to the study of different functioning plant tissues and their biochemical responses to various pathological, physiological, and toxicological stresses are illustrated with examples using ^{31}P , ^{13}C , ^{23}Na , and ^{15}N resonance methods. An introductory chapter presents a review of the in vivo literature and some basic principles and requirements for carrying out such experiments. A special section focuses on state of the art ^{13}C and ^1H high resolution multidimensional methods and their application to the study of agricultural toxins, biologically active components including their structures and biosyntheses, and dynamic measurements of relaxation phenomena associated with cross relaxation in water bound to food proteins.

Advances in Carbohydrate Chemistry and Biochemistry, 2012-07-13 Since its inception in 1945, this serial has provided critical and integrating articles written by research specialists that integrate industrial analytical and technological aspects of biochemistry, organic chemistry, and instrumentation methodology in the study of carbohydrates. The articles provide a definitive interpretation of the current status and future trends in carbohydrate chemistry and biochemistry. Contributions from leading authorities inform and update on all the latest developments in the field. *Hydrogen Bonding in Biological Structures* George A. Jeffrey, Wolfram Saenger, 2012-12-06

Hydrogen bonds are weak attractions with a binding strength less than one tenth that of a normal covalent bond. However, hydrogen bonds are of extraordinary importance; without them, all wooden structures would collapse, cement would crumble, oceans would vaporize, and all living things would disintegrate into random dispersions of inert matter. *Hydrogen Bonding in Biological Structures* is informative and eminently usable. It is in a sense a Rosetta stone that unlocks a wealth of information from the language of crystallography and makes it accessible to all scientists. From a book review of Kenneth M. Harmon, Science, 1992. **Handbook of Textile Fibre**

Structure Stephen Eichhorn, J. W. S. Hearle, M. Jaffe, T. Kikutani, 2009-10-19 Due to their complexity and diversity, understanding the structure of textile fibres is of key importance. This authoritative two volume collection provides a comprehensive review of the structure of an extensive range of textile fibres. Volume 1 begins with an introductory set of chapters on fibre structure and methods to characterise fibres. The second part of the book covers the structure of manufactured polymer fibres such as polyester, polyamides, polyolefin, elastomeric, and aramid fibres, as well as high modulus, high tenacity polymer fibres. Chapters discuss fibre formation during processing and how this affects fibre structure and mechanical properties. A companion volume reviews natural, regenerated, inorganic, and specialist fibres. Edited by leading

authorities on the subject and with a team of international authors the two volumes of the Handbook of textile fibre structure is an essential reference for textile technologists fibre scientists textile engineers and those in academia The first title of a authoritative two volume collection that provides a comprehensive review of the structure of a range of textile fibres Provides an overview of the development of fibre structure and methods to characterise fibres Examines the structure of both

traditional and new fibres and natural and manufactured fibres **Advances in Carbohydrate Chemistry and Biochemistry** David C. Baker,2021-12-04 Advances in Carbohydrate Chemistry and Biochemistry Volume 80 highlights new advances in the field with this new volume presenting interesting chapters on a range of topics including Vinyl Sulfone Modified Carbohydrates Michael Acceptors and 2 Partners for the Synthesis of Functionalized Sugars Enantiomerically Pure Carbocycles and Heterocycles and a Biographical Memoire for Leslie Hough Features contributions from leading authorities and industry experts who specialize in carbohydrate chemistry biochemistry and research Integrates the industrial analytical and technological aspects of biochemistry organic chemistry and instrumentation methodology in the study of carbohydrates Informs and updates on all the latest developments in the field Aqueous Pretreatment of Plant Biomass for Biological and Chemical Conversion to Fuels and Chemicals Charles E.
