verbal system is for most grammarians the keystone of the language Notable for the regularity of its patterns it presents the linguist with an unparalleled opportunity to explore the Saussurean notion of the indivisible sign form and meaning Whilst Arabic forms are well documented the elucidation of the corresponding meanings has proved more challenging Beginning with an examination of the verbal morphology of Modern Standard Arabic including an evaluation of the significance of the consonantal root this volume then concentrates on establishing the function of the vowel lengthening verbal patterns III and VI It explores issues of mutuality and reciprocity valency and transitivity ultimately focusing on atelic lexical aspect as the unified meaning of these patterns This study is rich in data and relies extensively upon contemporary examples with transliteration and translation to illustrate its arguments adopting an empirical structuralist approach which is aimed both at general linguists and at specialist Arabists Structure and Function of the Arabic Verb Maher Bahloul, 2007-08-07

Structure and Function of the Arabic Verb is a corpus based study that unveils the morpho syntax and the semantics of the Arabic verb Approaches to verbal grammatical categories the constituents of verbal systems often rely on either semantic pragmatic or syntactic analyses This research bridges the gap between these two distinct approaches through a detailed analysis of Taxis Aspect Tense and Modality in Standard Arabic This is accomplished by showing firstly some basic theoretical concerns shared by both schools of thought and secondly the extent to which semantic structures and invariant meanings mirror syntactic representations Maher Bahloul s findings also indicate that the basic constituents of the verbal system in Arabic namely the Perfect and the Imperfect are systematically differentiated through their invariant semantic features in a markedness relation Finally this study suggests that the syntactic derivation of verbal and nominal clauses are sensitive to whether or not verbal categories are specified for their feature values providing therefore a principled explanation to a long standing debate This reader friendly book will appeal to both specialists and students of Arabic linguistics language and syntax
