The Making Of Europe Conquest Colonization And Cultural Change 950 135:

The Making of Europe Robert Bartlett, 1993 This provocative book shows that Europe in the Middle Ages was as much a product of a process of conquest and colonization as it was later a colonizer Will be of great interest to those interested in cultural transformation colonialism racism the Crusades or holy wars in general William C Jordan Princeton University 12 halftones 12 maps 6 diagrams **The Cambridge History of Christianity: Volume 4, Christianity in Western Europe, c.1100-c.1500** Miri Rubin, Walter Simons, 2014-07-31 During the early middle ages Europe developed complex and varied Christian cultures and from about 1100 secular rulers competing factions and inspired individuals continued to engender a diverse and ever changing mix within Christian society This volume explores the wide range of institutions practices and experiences associated with the life of European Christians in the later middle ages The clergy of this period initiated new approaches to the role of priests bishops and popes and developed an ambitious project to instruct the laity For lay people the practices of parish religion were central but many sought additional ways to enrich their lives as Christians Impulses towards reform and renewal periodically swept across Europe led by charismatic preachers and supported by secular rulers This book provides accessible accounts of these complex historical processes and entices the reader towards further enquiry

Capital and Labour Redefined Amiya Kumar Bagchi, 2002 This book provides a historical background to the formation of the Indian capitalist class from before British colonial rule in India It analyses the nature of that class the ways in which it changed under colonial rule and the state of independent India it also sets some of the peculiarities of capitalist organization in India and the ideology of big capital in their historical context The evolution of the working class in India is analysed in its dialectical interaction with global capital and Indian capitalism The author challenges the view that the tensions within working class movements caused by caste communal divisions or gender discrimination are to be attributed to primordial loyalties emphasizing instead the influence of the deliberate strategies adopted by capitalists and of changes in the structure of global and Indian capitalism Finally the book investigates the impact of capital friendly liberalization on the fortunes of the working class in the Third World *Writing and Fantasy* Ceri Sullivan, 2014-06-11 Writing and Fantasy brings together essays which restore a sense of the fantastic as a political response to cultural opportunities and pressures It moves on from two conventional fields of discussion the psychoanalytic where phantasies are produced by the emergence of the consciousness and the social where fantasies are the production of nineteenth century individualism Chapters run from the classical period to the twentieth century each focusing on a local reading of how fantasy acts as a strategy to contain or exploit specific historical and cultural moments A wide variety of sites are investigated including the feminization of the wild west originary and maternal spaces highwaywomen financial credit and the ideal home Multiple genres containing fantasy are explored ranging from ghost stories to feminist utopias Aids to the reader include an introduction summarising recent discussions of fantasy illustrations dealing with visual fantasies and an annotated bibliography The new research presented

here will be of great interest to academics and students in literature history and cultural studies departments who are working in the field of the historical development of concepts of fantasy cultural opposition and the imbrication of politics and modes of representation

Imaginary Cartographies Daniel Lord Smail, 2018-10-18 How in the years before the advent of urban maps did city residents conceptualize and navigate their communities In his strikingly original book Daniel Lord Smail develops a new method and a new vocabulary for understanding how urban men and women thought about their personal geography His thorough research of property records of late medieval Marseille leads him to conclude that its inhabitants charted their city its social structure and their own identities within that structure through a set of cartographic grammars which powerfully shaped their lives Prior to the fourteenth century different interest groups notaries royal officials church officials artisans developed their own cartographies in accordance with their own social political or administrative agendas These competing templates were created around units ranging from streets and islands to vicinities and landmarks Smail shows how the notarial template which privileged the street as the most basic marker of address gradually emerged as the cartographic norm This transformation he argues led to the rise of modern urban maps and helped to inaugurate the process whereby street addresses were attached to citizen identities a crucial development in the larger enterprise of nation building *Imaginary Cartographies* opens up powerful new means for exploring late medieval and Renaissance urban society while advancing understanding of the role of social perceptions in history

[The March of Wales 1067-1300](#) Max Lieberman, 2018-06-15 By 1300 a region often referred to as the March of Wales had been created between England and the Principality of Wales This March consisted of some forty castle centred lordships extending along the Anglo Welsh border and also across southern Wales It took shape over more than two centuries between the Norman conquest of England 1066 and the English conquest of Wales 1283 and is mentioned in Magna Carta 1215 It was a highly distinctive part of the political geography of Britain for much of the Middle Ages yet the medieval March has long vanished and today expressions like the marches are used rather vaguely to refer to the Welsh Borders What was the medieval March of Wales How and why was it created *The March of Wales 1067 1300 A Borderland of Medieval Britain* provides comprehensible and concise answers to such questions With the aid of maps a list of key dates and source material such as the writings of Gerald of Wales c 1146 1223 this book also places the March in the context of current academic debates on the frontiers peoples and countries of the medieval British Isles

Time, History, and Belief in Aztec and Colonial Mexico Ross Hassig, 2001-04-15 Based on their enormously complex calendars that recorded cycles of many kinds the Aztecs and other ancient Mesoamerican civilizations are generally believed to have had a cyclical rather than linear conception of time and history This boldly revisionist book challenges that understanding Ross Hassig offers convincing evidence that for the Aztecs time was predominantly linear that it was manipulated by the state as a means of

controlling a dispersed tribute empire and that the Conquest cut off state control and severed the unity of the calendar leaving only the lesser cycles From these he asserts we have inadequately reconstructed the pre Columbian calendar and so misunderstood the Aztec conception of time and history Hassig first presents the traditional explanation of the Aztec calendrical system and its ideological functions and then marshals contrary evidence to argue that the Aztec elite deliberately used calendars and timekeeping to achieve practical political ends He further traces how the Conquest played out in the temporal realm as Spanish conceptions of time partially displaced the Aztec ones His findings promise to revolutionize our understanding of how the Aztecs and other Mesoamerican societies conceived of time and history **From Al-Andalus to the Americas (13th-17th Centuries)** ,2018-06-12 From Al Andalus to the Americas 13th 17th Centuries Destruction and Construcion of Societies offers a multi perspective view of the filiation of different colonial and settler colonial experiences from the Medieval Iberian Peninsula to the early Modern Americas All the articles in the volume refer the reader to colonial orders that extended over time that substantially reduced indigenous populations that imposed new productive strategies and created new social hierarchies The ideological background and how conquests were organised the treatment given to the conquered lands and people the political organisations and the old and new agricultural systems are issues discussed in this volume Contributors are David Abulafia Manuel Ardit Antonio Espino Adela F bregas Josep M Fradera Enric Guinot Helena Kirchner Antonio Malpica Virgilio Mart nez Enamorado Carmen Mena Ant nio Mendes F lix Retamero Inge Schjellerup Josep Torr and Antoni Virgili **Principles of Comparative Politics** William Roberts Clark,Matt Golder,Sona Nadenichek Golder,2017-02-23 William Roberts Clark Matt Golder and Sona Nadenichek Golder s groundbreaking Principles of Comparative Politics offers the most comprehensive and up to date introduction to comparative inquiry research and scholarship In this thoroughly revised Third Edition readers have an even better guide to cross national comparison and why it matters Readers are offered a new intuitive take on statistical analyses and a clearer explanation of how to interpret regression results a thoroughly revised chapter on culture and democracy that now includes a more extensive discussion of cultural modernization theory and a new overview of survey methods for addressing sensitive topics and a revised chapter on dictatorships that incorporates a principal agent framework for understanding authoritarian institutions Examples from the gender and politics literature have been incorporated into various chapters and empirical examples and data on various types of institutions have been updated The book s outstanding pedagogy includes more than 250 tables and figures numerous photos and maps end of chapter exercises and problem sets and a broader set of works cited New to this Edition A new intuitive take on statistical analyses and a clearer explanation of how to interpret regression results are included A thoroughly revised chapter on culture and democracy includes a more extensive discussion of cultural modernization theory and a new overview of survey methods for addressing sensitive topics A revised chapter on dictatorships incorporates a principal agent framework for understanding authoritarian institutions Examples from the

David I Richard D. Oram, 2020-03-05 David I was never expected to become king but on succeeding to the Scottish throne in 1124 he quickly demonstrated that he had the skills ruthlessness and ambition to become one of the kingdom's greatest rulers Drawing on the experiences and connections of his youth spent at the court of his brother in law Henry I of England and moulded by the dominant personality and intense piety of his mother St Margaret he set out to transform his inheritance and create a powerful and dynamic kingship After neutralising all challengers to his position and building a new powerbase that drew on support from both Scotland's native nobles and the English and French knights whom he settled in his realm David emerged as a power broker in mid twelfth century Britain as England descended into civil war He pursued his wife Matilda's lost inheritance in Northumbria gaining control over much of northern England and giving him access to economic resources that allowed him to invest in patronage of the reformed monastic orders and in the reconfiguration of the secular Church in Scotland The peace and stability of his kingdom coupled with the economic boom brought by burgeoning population during an era of benign climate conditions secured him a reputation as a saintly visionary who achieved the cultural and political transformation of Scotland
