Alternative Medicine and Rehabilitation Dr. Avital Fast, MD, Dr. Stanley F. Wainapel, MD, MPH, 2002-11-01 Although unconventional therapies have coexisted with traditional medicine for centuries the extent of their utilization was only recently recognized we now know between one third and one half of patients receiving traditional rehabilitation therapies have had some experience with what has come to be referred to variously as alternative complementary or integrative medicine Given the pervasiveness and popularity of alternative medicine physicians and other health professionals should be able to appropriately advise or counsel patients regarding the potential benefits or problems associated with such interventions In order to do so they need to become familiar with some of the more common therapies and the rapidly expanding research literature that has grown around them The present volume addresses these needs and will serve as an introductory guide for rehabilitation practitioners who wish to expand their range of treatment options This book does not presume or attempt to be an encyclopedic compendium of all types of alternative medicine services Instead we have selected representative therapies that will serve to introduce the reader to the wide range of therapies available The book has organized the chapters into categories that emphasize their kinship with the specialty of Physical Medicine and Rehabilitation manipulation therapeutic movement mind body techniques and physical modalities Subsequent sections deal with research and reimbursement while the final chapters highlight specific therapies in the clinical management of several common disabling disorders This book will be of considerable interest to a wide range of medical specialists particularly those who treat chronic or painful disabling diseases physiatrists neurologists rheumatologists orthopedists neurosurgeons anesthesiologists internists and primary care physicians Additionally physical and occupational therapists psychologists chiropractors and herbalists will find its contents useful Finally practitioners of any

of the individual therapies included in the contents will find a wealth of scientific and clinical documentation to utilize in their practices
