*The Many Faces of God* Walter Prucnel, 2007-08 God looked at the earth with

despair He knew the future of earth was dismal it was prone to the pollutions created by man Worse yet people in many countries were killing others for their different religious beliefs Gone was the day of the cross and bow when men fought each other face to face Now many countries were making weapons that could travel great distances to kill millions This both saddened and angered Him and He knew something had to be done Should I create another flood Have everyone turned into salt No none of these would work because many souls would be sent to Hell and Satan could not accommodate that many He could perform miracles to improve these conditions but that would take away the Earthlings freewill The only solution was for the Earthlings to improve their own fate with a little help from Him Summoning his Undergods He gave them instructions to choose a few Earthlings approach them through apparitions and give them minor powers which would aid them in their missions Thus The Many Faces of God begins

Clinical Case Studies in the Behavioral Treatment of Alcoholism William M. Hay, Peter E. Nathan, 2012-12-06 There is no shortage of books on behavioral research on behavioral research on alcoholism or on behavioral research on alcoholism treatment Most of the authors of chapters in this book have been involved in the writing of these books The books and their authors have played an important role in the dramatic increase in the influence of behavioral approaches to one of our society's most troubling human problems There are not many books though which detail the longitudinal course of the behavioral therapies none doing so for behavior therapy with alcoholics and problem drinkers That this book now appears then is a first made more valuable by the fact that the chapter's authors are both researchers and clinicians willing and able to combine respect for empirical data with clinical sensitivity and compassion concern and commitment for their patients The chapters in this book reveal important commonalities and telling divergencies in technique strategy and treatment tactics Despite a common perspective on etiology and treatment the authors of the chapters in this book diverge in criteria for deciding on treatment goal choice of initial intervention target the specifics of techniques used and follow up procedures Common to all though is an openness to innovation a pragmatic appreciation of approaches that work and a sincere respect for the patient and his or her fundamental desire for a healthy happier and more productive life
