Law and Macroeconomics Yair Listokin, 2019-03-11 A distinguished Yale economist and legal scholar's argument that law of all things has the potential to rescue us from the next economic crisis After the economic crisis of 2008 private sector spending took nearly a decade to recover Yair Listokin thinks we can respond more quickly to the next meltdown by reviving and refashioning a policy approach whose proven success is too rarely acknowledged Harking back to New Deal regulatory agencies Listokin proposes that we take seriously law's ability to function as a macroeconomic tool capable of stimulating demand when needed and relieving demand when it threatens to overheat economies Listokin makes his case by looking at both positive and cautionary examples going back to the New Deal and including the Keystone Pipeline the constitutionally fraught bond buying program unveiled by the European Central Bank at the nadir of the Eurozone crisis the ongoing Greek crisis and the experience of U S price controls in the 1970s History has taught us that law is an unwieldy instrument of macroeconomic policy but Listokin argues that under certain conditions it offers a vital alternative to the monetary and fiscal policy tools that stretch the legitimacy of technocratic central banks near their breaking point while leaving the rest of us waiting and wallowing

Macroeconomic Foundations of Macroeconomics Alvaro Cencini, 2012-10-12 Contrary to common belief macroeconomics is not merely a theory of aggregates and cannot be constructed from individual behaviour Both nationally and internationally there are economic laws that are logically independent of economic agents' behaviour These are the macroeconomic foundations of macroeconomics Presenting cutting edge material Alvaro Cencini explores these foundations and shows that the introduction of money entails economics being interpreted conceptually not mathematically His innovative book provides the elements for a new approach by applying the most recent results of monetary analysis to the study of national and international economics It covers recent progress in monetary theory provides the reader with a greater understanding of the subject and will be essential reading for economic students as well as a valuable resource for economists

The New Horizon of China's Economic Law Theory Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in

economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory

Inflation, Unemployment and Capital Malformations Bernard

Schmitt, 2021-06-23 The volume deals with the main problems faced by capitalist economies inflation and unemployment in a new and original way and provides the theoretical foundations for quantum macroeconomic analysis Its aim is to allow English speaking economists and interested readers to have a direct access to the analysis provided by Schmitt in his 1984

book *Inflation chmage et malformations du capital* Orthodox economics has failed to provide a consistent insight of the pathologies hindering our economies and both the academic and the economic worlds are much in need for an alternative approach capable to explain the origins of these pathologies and how they can eventually be disposed of Schmitt's volume provides a revolutionary explanation of the cause of today's economic disorder as well as an innovative solution allowing for the passage from disorder to order Neoclassical and Keynesian theories of any type are essentially based on equilibrium analysis and this is why none of them has ever been able to provide a consistent macroeconomic analysis based on macroeconomic foundations This is what Schmitt's book aims for developing a new analysis built on identities rather than conditions of equilibrium capable to explain the objective origins of inflation and unemployment In this volume Schmitt introduces a new revolutionary analysis centred on the concept of quantum time The topics analysed by Schmitt cover the entire field of national macroeconomics from production to capital accumulation the leading role in this ground breaking investigation being played by what he calls the theory of emissions The ensuing macroeconomic theory is built on a set of laws derived from the monetary nature of our economic systems and defines the logical framework of inquiry into modern macroeconomics

one hand and the lack of direct legal action on the other Analysing the role of social policy instruments fundamental rights and the constitutional framework of the European Union it makes a detailed case for a contribution of EU law to the policy objective of combating poverty and social exclusion Drawing on work in law politics social policy and economics this book will interest scholars and policymakers in the areas of EU law labour and social security human rights political science and social and public policy The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution CC BY 4.0 license
