The Making Of An Ex Astronaut:

The Making of an Ex-astronaut Brian O'Leary, 1970 *The Making of an Ex-astronaut* Brian O'Leary, 1970 **NASA's Scientist-Astronauts** Shayler David, Colin Burgess, 2007-09-19 Mounting pressure in the early 1960s from the National Academy of Sciences NAS to study ways of expanding the role of astronauts to conduct science on future space missions led to NASA's conclusion that flying scientifically trained crewmembers would generate greater returns from each mission NASA and industry studies continued investigating possibilities that could lead to the eventual creation of the first space stations using surplus Apollo hardware through the Apollo Applications Programme AAP There was also a growing interest within the military to create their own manned space station programme conducting on orbit experiments and research with strategic advantages for national security In October 1964 the Soviets launched Voskhod 1 whose 3 man crew were identified as the first scientific passengers in space A few days later NASA and the NAS had completed joint studies into the possibility of using scientists in the manned space programme and invited scientists to apply for astronaut training In selecting the first group of scientist astronauts NASA had one firm requirement any person accepted into the programme would have to qualify as a military jet pilot While the second group of scientists were completing their academic survival and flight training programme the remaining members of the first scientist astronaut group were involved in supporting the developing Apollo Applications programme and the Apollo lunar programme *Modern Esoteric* Brad Olsen, 2017-08-02 This completely reworked second edition of *Modern Esoteric* includes new information over a dozen additional images and up to date revisions Winner of the Best Book Design 2014 *Modern Esoteric* examines the flaws in modern history and looks at how conspiracy theories esoteric knowledge and fringe subjects can be used to help change the dead end course humanity seems to be following The Lifeology section explores the long and storied alternative narrative of life on this planet In the Control section author Brad Olsen examines how Big Brother is here in the form of the New World Order and how they keep the knowledge of humankind's true nature from the mass population Finally the Thrive section looks at all the ways humans are evolving to achieve their full potential **A History of Modern Planetary Physics** Stephen G. Brush, 1996-04-26 Where did we come from Before there was life there had to be something to live on a planet a solar system During the past 200 years astronomers and geologists have developed and tested several different theories about the origin of the solar system and the nature of the Earth Together the three volumes that make up *A History of Modern Planetary Physics* present a survey of these theories The early twentieth century saw the replacement of the Nebular Hypothesis with the Chamberlain Moulton theory that the solar system resulted from the encounter of the Sun with a passing star *Fruitful Encounters* follows the eventual refutation of the encounter theory and the subsequent revival of a modernised Nebular Hypothesis Professor Brush also discusses the role of findings from the Apollo space programme especially the analysis of lunar samples culminating in the establishment in the 1980s of the giant impact theory of the Moon's origin **Living Aloft** Mary M. Connors, Albert A.

Harrison, Faren R. Akins, 1985 Fallen Astronauts Colin Burgess, Kate Doolan, Bert Vis, 2016-05-01 Near the end of the Apollo 15 mission David Scott and fellow moonwalker James Irwin conducted a secret ceremony unsanctioned by NASA they placed on the lunar soil a small tin figurine called The Fallen Astronaut along with a plaque bearing a list of names By telling the stories of those sixteen astronauts and cosmonauts who died in the quest to reach the moon between 1962 and 1972 this book enriches the saga of humankind's greatest scientific undertaking Project Apollo and conveys the human cost of the space race Many people are aware of the first manned Apollo mission in which Gus Grissom Ed White and Roger Chaffee lost their lives in a fire during a ground test but few know of the other five fallen astronauts whose stories this book tells as well including Ted Freeman and C C Williams who died in the crashes of their T 38 jets the Gemini Twins Charlie Bassett and Elliot See killed when their jet slammed into the building where their Gemini capsule was undergoing final construction and Ed Givens whose fatal car crash has until now been obscured by rumors Supported by extensive interviews and archival material the extraordinary lives and accomplishments of these and other fallen astronauts including eight Russian cosmonauts who lost their lives during training unfold here in intimate and compelling detail Their stories return us to a stirring time in the history of our nation and remind us of the cost of fulfilling our dreams This revised edition includes expanded and revised biographies and additional photographs **Shoot for the Moon** James Donovan, 2019-03-12 Learn why NASA astronaut Mike Collins calls this extraordinary space race story the best book on Apollo this inspiring and intimate ode to ingenuity celebrates one of the most daring feats in human history When the alarm went off forty thousand feet above the moon's surface both astronauts looked down at the computer to see 1202 flashing on the readout Neither of them knew what it meant and time was running out On July 20 1969 Neil Armstrong and Buzz Aldrin became the first humans to walk on the moon One of the world's greatest technological achievements and a triumph of the American spirit the Apollo 11 mission was a mammoth undertaking involving more than 410 000 men and women dedicated to winning the space race against the Soviets Set amid the tensions and upheaval of the sixties and the Cold War Shoot for the Moon is a gripping account of the dangers the challenges and the sheer determination that defined not only Apollo 11 but also the Mercury and Gemini missions that came before it From the shock of Sputnik and the heart stopping final minutes of John Glenn's Mercury flight to the deadly whirligig of Gemini 8 the doomed Apollo 1 mission and that perilous landing on the Sea of Tranquility when the entire world held its breath while Armstrong and Aldrin battled computer alarms low fuel and other problems James Donovan tells the whole story Both sweeping and intimate Shoot for the Moon is a powerfully written and irresistible celebration of one of humankind's most extraordinary accomplishments Booklist starred review *Bibliography of Space Books and Articles from Non-aerospace Journals, 1957-1977* John J. Looney, 1980 **Astronauts and Cosmonauts Biographical and Statistical Data, Report Prepared for ..., June, 1975** United States. Congress. House. Science and Technology Committee, 1975 **A Man on the Moon** Andrew Chaikin, 2007-08-28 The authoritative masterpiece L A Times on the

Apollo space program and NASA's journey to the moon This acclaimed portrait of heroism and ingenuity captures a watershed moment in human history The astronauts themselves have called it the definitive account of their missions On the night of July 20 1969 our world changed forever when Neil Armstrong and Buzz Aldrin walked on the moon Based on in depth interviews with twenty three of the twenty four moon voyagers as well as those who struggled to get the program moving *A Man on the Moon* conveys every aspect of the Apollo missions with breathtaking immediacy and stunning detail *A Man on the Moon* is also the basis for the acclaimed miniseries produced by Tom Hanks *From the Earth to the Moon* now airing and streaming again on HBO in celebration of the 50th anniversary of Apollo 11

Human Factors Of Outer Space Production T. Stephen Cheston, 2019-03-13 The missions of the early space age when a relatively few very highly trained physically fit male pilot astronauts operated for short times will be supplemented in the future by missions where large numbers of nonpilot astronaut men and women will work in orbit for long periods of time on research and industry related tasks The lengthening and changing complexity of space operations requires that the psychosocial habitat design food systems and economic aspects of humans working in space be reviewed carefully In this volume an interdisciplinary group of experts addresses these aspects of space work and delineates avenues for future research

Into That Silent Sea Francis French, Colin Burgess, 2009-09-01 A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles

Digital Apollo David A. Mindell, 2011-09-30 The incredible story of how human pilots and automated systems worked together to achieve the ultimate achievement in flight the lunar landings of NASA's Apollo program As Apollo 11's Lunar Module descended toward the moon under automatic control a program alarm in the guidance computer's software nearly caused a mission abort Neil Armstrong responded by switching off the automatic mode and taking direct control He stopped monitoring the computer and began flying the spacecraft relying on skill to land it and earning praise for a triumph of human over machine In *Digital Apollo* engineer historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program In each of the six Apollo landings the astronaut in command seized control from the computer and landed with his hand on the stick Mindell recounts the story of astronauts' desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer From the early days of aviation through the birth of spaceflight test pilots and astronauts sought to be more than *spam* in a can despite the automatic controls digital computers and software developed by engineers *Digital Apollo* examines the design and execution of each of the six Apollo moon landings drawing on transcripts and data telemetry from the flights astronaut interviews and NASA's extensive archives Mindell's exploration of how human pilots and automated systems worked together to achieve the ultimate in flight a lunar landing traces and reframes the debate over the future of humans and automation in space The results have implications for any venture in which human roles seem threatened by automated systems whether it is the work at our desktops or the

future of exploration *Light This Candle* Neal Thompson, 2007-12-18 The definitive biography of Alan Shepard America's first man in space with a new Foreword by Chris Kraft One of the finest books ever written about the space program Homer Hickman author of *Rocket Boys* A wonderful and gripping biography meticulously reported in the best tradition of David Halberstam Buzz Bissinger New York Times bestselling author of *Friday Night Lights* Alan Shepard was the brashest cockiest and most flamboyant of America's original Mercury Seven but he was also regarded as the best Intense colorful and dramatic he was among the most private of America's public figures and until his death in 1998 he guarded the story of his life zealously *Light This Candle* based on Neal Thompson's exclusive access to private papers and interviews with Shepard's family and closest friends including John Glenn Wally Schirra and Gordon Cooper offers a riveting action packed account of Shepard's life *Chapel Hill* James Vickers, 1996-11-01 From humble beginnings as a rustic settlement formed around a chapel on a hill New Hope Chapel Hill in the mid eighteenth century Chapel Hill has attained international recognition as one of the foremost centers of education in the United States Despite the fact that their town is flourishing Chapel Hillians still think of it as a village and it is the combination of a small Southern town and a concentration of creative progressive people that makes Chapel Hill special Although Chapel Hill is known for its ability to move with the times it is also aware of the importance of the past and the need to preserve local history **NASA Technical Paper** , 1979 **In the Shadow of the Moon** Francis French, Colin Burgess, 2007-01-01 Tells the story of the exciting and challenging years in space flight with two superpowers engaged in a titanic struggle to land one of their own people on the moon This book explores the inspirations ambitions personalities and experiences of the select few whose driving ambition was to fly to the moon *From the Laboratory to the Moon* David H. DeVorkin, 2025-05-20 The reserved genius and celebrated Black scientist who built the first astronomical observatory on the moon and worked to inspire underserved students to pursue science and engineering In April 1972 as George Carruthers closely monitored the operation from the Manned Spacecraft Center in Houston astronauts conducting the Apollo 16 mission positioned a gold plated far ultraviolet electrographic camera on the moon The camera Carruthers's invention was the first astronomical observatory on the lunar surface where it stands to this day While Carruthers's achievements earned many accolades including the President's Medal for Technology and Invention surprisingly little is known about this remarkable man In *From the Laboratory to the Moon* David DeVorkin explores Carruthers's life and work for the first time telling the full story of how a deeply reserved African American farm boy rose to become one of our most celebrated aerospace scientists DeVorkin follows Carruthers from his childhood in Ohio and then Chicago to his career at the US Naval Research Laboratory in Washington DC In the highly competitive world of space science in the 1960s and 1970s Carruthers's genius for experimentation and exploration transcended the racial stereotyping and discrimination of his day and he achieved world class recognition for his studies of the Earth and deep space A leading expert in the history of astronomy and space science DeVorkin gives a deft account of these achievements and of how Carruthers used the fame they

brought him along with his notoriety as a Black man in science to become a tireless advocate for underserved young people in science and engineering

Calculated Risk George Leopold, 2016-06-15 Unlike other American astronauts Virgil I Gus Grissom never had the chance to publish his memoirs Killed along with his crew in a launch pad fire on January 27 1967 Grissom also lost his chance to walk on the moon and return to describe his journey Others went in his place The stories of the moon walkers are familiar Less appreciated are Grissom's contributions The international prestige of winning the Moon Race cannot be understated and Grissom played a pivotal and enduring role in securing that legacy for the United States Indeed Grissom was first and foremost a Cold Warrior a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon Drawing on extensive interviews with fellow astronauts NASA engineers family members and friends of Gus Grissom George Leopold delivers a comprehensive and corrective account of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight *Calculated Risk The Supersonic Life and Times of Gus Grissom* adds significantly to our understanding of that tumultuous and ultimately triumphant period in American history
