The Making Of Manchester The Making Of:

The Making of Manchester Mike Fletcher, 2003-02-25 A concise history of the Northern English city from its Roman origins to today's metropolitan hub In *The Making of Manchester* author Mike Fletcher shows how this thriving city has made and re-made itself through the centuries Beginning as a Roman settlement anchored by the fort of Mancunium it was later conquered by the Anglo Saxons who renamed the region Manchester meaning Men of the Fort In the Medieval and Early Modern periods Manchester survived hostile forces of all kinds from the English Civil Wars to the rising of the Jacobites Yet Manchester changed its image during the Industrial Revolution becoming Cottonopolis and the center of the canal and railway network Yet along with prosperity the city faced hardship and poverty which lingered well into the twentieth century

Canals: The Making of a Nation Liz McIvor, 2015-08-13 Canals hold a unique place in British culture with associations of lazy summer afternoons journeying through lush green countryside But as Liz McIvor explains in the book to accompany her BBC series the story of our canals is also the story of how modern Britain was born It was the canals that helped open up the trade of the Industrial Revolution furthered the new science of geology and even ushered in a new form of architecture The legacy of our canals is all around us In *Canals The Making of a Nation* McIvor takes us on a journey across the network of English canals to tell a deeper story of how our waterways changed our lives It's a very modern tale full of high finance and greedy investors cheap labour and the struggle for workers rights and new frontiers in family and child welfare It's a unique and compelling exploration of Britain's golden age

Behemoth: A History of the Factory and the Making of the Modern World Joshua B. Freeman, 2018-02-27 Freeman's rich and ambitious *Behemoth* depicts a world in retreat that still looms large in the national imagination More than an economic history or a chronicle of architectural feats and labor movements Jennifer Szalai *New York Times* In an accessible and timely work of scholarship celebrated historian Joshua B. Freeman tells the story of the factory and examines how it has reflected both our dreams and our nightmares of industrialization and social change He whisks readers from the early textile mills that powered the Industrial Revolution to the factory towns of New England to today's behemoths making sneakers toys and cellphones in China and Vietnam *Behemoth* offers a piercing perspective on how factories have shaped our societies and the challenges we face now

The Jews of Britain, 1656 to 2000 Todd M. Endelman, 2002-03-01 In Todd Endelman's spare and elegant narrative the history of British Jewry in the modern period is characterized by a curious mixture of prominence and inconspicuousness British Jews have been central to the unfolding of key political events of the modern period especially the establishment of the State of Israel but inconspicuous in shaping the character and outlook of modern Jewry Their story less dramatic perhaps than that of other Jewish communities is no less deserving of this comprehensive and finely balanced analytical account Even though Jews were never completely absent from Britain after the expulsion of 1290 it was not until the mid-seventeenth century that a permanent community took root Endelman devotes chapters to the resettlement to the integration and acculturation that

took place more intensively than in other European states during the eighteenth century to the remarkable economic transformation of Anglo Jewry between 1800 and 1870 to the tide of immigration from Eastern Europe between 1870 and 1914 and the emergence of unprecedented hostility to Jews to the effects of World War I and the turbulent events up to and including the Holocaust and to the contradictory currents propelling Jewish life in Britain from 1948 to the end of the twentieth century We discover not only the many ways in which the Anglo Jewish experience was unique but also what it had in common with those of other Western Jewish communities

Making Scientific Instruments in the Industrial Revolution A.D. Morrison-Low, 2017-03-02 At the start of the Industrial Revolution it appeared that most scientific instruments were made and sold in London but by the time of the Great Exhibition in 1851 a number of provincial firms had the self confidence to exhibit their products in London to an international audience How had this change come about and why This book looks at the four main and two lesser English centres known for instrument production outside the capital Birmingham Liverpool Manchester and Sheffield along with the older population centres in Bristol and York Making wide use of new sources Dr Morrison Low curator of history of science at the National Museums of Scotland charts the growth of these centres and provides a characterisation of their products New information is provided on aspects of the trade especially marketing techniques sources of materials tools and customer relationships From contemporary evidence she argues that the principal output of the provincial trade with some notable exceptions must have been into the London marketplace anonymously and at the cheaper end of the market She also discusses the structure and organization of the provincial trade and looks at the impact of new technology imported from other closely allied trades By virtue of its approach and subject matter the book considers aspects of economic and business history gender and the family the history of science and technology material culture and patterns of migration It contains a myriad of stories of families and firms of entrepreneurs and customers and of organizations and arms of government In bringing together this wide range of interests Dr Morrison Low enables us to appreciate how central the making selling and distribution of scientific instruments was for the Industrial Revolution

William Stanley Jevons and the Making of Modern Economics Harro Maas, 2005-04-04 This book examines William Stanley Jevons's role in revolutionizing nineteenth century economics

The Making of Home Judith Flanders, 2015-09-08 The idea that home is a special place a separate place a place where we can be our true selves is so obvious to us today that we barely pause to think about it But as Judith Flanders shows in her best and most ambitious work to date home is a relatively new idea In *The Making of Home* Flanders traces the evolution of the house from the sixteenth to the early twentieth century across northern Europe and America showing how the homes we know today bear only a faint resemblance to homes through history What turned a house into the concept of home Why did northwestern Europe a politically unimportant sociologically underdeveloped region of the world suddenly become the powerhouse of the Industrial Revolution the capitalist crucible that created modernity While investigating these important questions Flanders uncovers the

fascinating development of ordinary household items from cutlery chairs and curtains to the fitted kitchen plumbing and windows while also dismantling many domestic myths In this prodigiously researched and engagingly written book Flanders brilliantly and elegantly draws together the threads of religion history economics technology and the arts to show not merely what happened but why it happened how we ended up in a world where we can all say like Dorothy in Oz There s no place like home
