The Mandate The Suicide:

The Truth about Veterans' Suicides United States. Congress. House. Committee on Veterans' Affairs, 2009 *Rational Suicide, Irrational Laws* Susan Stefan, 2016 Rational Suicide Irrational Laws argues that laws aimed at preventing suicide and laws aimed at facilitating it co exist because they are based on two radically disparate conceptions of the would be suicide This is the first book that unifies policies and laws toward people who want to end their lives **Suicide Awareness and Prevention** United States. Congress. Senate. Committee on Appropriations. Subcommittee on Departments of Labor, Health and Human Services, Education, and Related Agencies, 2001 **Suicide** Jon Klimo, Pamela Rae Heath, 2006-06-12 This provocative study explores what happens to those who commit suicide Drawing on communications from the spirits of more than 100 successful suicides it offers an intriguing look at what the dead themselves say about suicide its repercussions and their experiences in the afterlife Bringing together the channeled messages of three types of suicide traditional suicide assisted suicide and the suicide mass murder adopted by terrorists the book covers a wide range of topics including why people commit suicide what it is like to cross over adjustment problems what suicides would say to those left behind and what they would tell others thinking of taking their own lives Additionally the book conveys powerful messages from suicide bombers warning potential terrorists of the serious karmic consequences that await them For anyone contemplating suicide or euthanasia the book offers profound sometimes unsettling insight into the ramifications of these acts Suicide John Bateson, 2024-09-03 An urgent call to action on a rising and preventable trend Each year in the United States alone nearly 50 000 individuals die by suicide more than 1 2 million others attempt it John Bateson former executive director of a suicide prevention center examines this national tragedy from multiple angles while debunking common myths sharing demographic data and identifying risk factors and warning signs Suicide provides essential information about the current landscape surrounding suicide in the United States as well as strategies to prevent further tragedy Bateson emphasizes that the rise in suicide and attempted suicide is not only a mental health issue affecting individuals but also an urgent problem for society at large He discusses suicide in parks prisons and the military as well as assisted suicide suicide by cop and murder suicide In particular he details the stark relationship among guns drugs jump sites and suicide focusing on one of the most effective ways to prevent suicide restricting access to lethal means In addition to presenting practical information for identifying people at risk of suicide Bateson details important steps that individuals businesses and the government can take to end this public health problem Russian Tragifarce Julia Listengarten, 2000-06 The tradition of Russian tragifarce can be characterized by its strong links to Russian political and cultural history and by its significant role in the development of Russian dramatic literature and theater practice The book argues that the dualistic character of Russian tragifarce which is close in spirit and philosophy to Bakhtin's understanding of the medieval carnival embodies the ambivalent spirit of Russian culture and politics The book further argues that the tragifarcical perception of the world can be seen as a national

characteristic of the self doubting and ironic Russian sensibility under the influence of a repressive political regime

BOOK JACKET *Identity, Otherness and Empire in Shakespeare's Rome* Maria Del Sapio Garbero, 2016-12-14 Contributors to this collection delve into the relationship between Rome and Shakespeare They view the presence of Rome in Shakespeare's plays not simply as an unquestioned model of imperial culture or a routine chapter in the history of literary influence but rather as the problematic link with a distant and foreign ancestry which is both revered and ravaged in its translation into the terms of the Bard's own cultural moment During a time when England was engaged in constructing a rhetoric of imperial nationhood the contributors demonstrate that Englishmen used Roman history and the classical heritage to mediate a complex range of issues from notions of cultural identity and gender to the representation of systems of exchange with Otherness in the expanding ethnic space of the nation This volume addresses matters of concern not only for Shakespeare scholars but also for students interested in issues connected with gender postcolonialism and globalization Drawing implicitly or explicitly on recent criticism intertextual studies postcolonial theory Derrida's conceptualization of hospitality gender studies global studies the essayists explore how the Roman Shakespeare of an emerging early modern empire asks questions of our present as well as of our past

Preventive Strategies on Suicide Diekstra, Gulbinat, Kienhorst, Leo, 2023-07-31 Recent estimates by The World Health Organisation and The World Bank indicate that throughout the world each and every year more than 800 000 persons die as a consequence of suicide This means that the death toll of suicide equals and in many countries even exceeds that of road traffic accidents In addition to the number of suicidal deaths at least ten times as many persons make non fatal attempts to take their lives or harm themselves often seriously enough to require medical attention and not infrequently resulting in irreversible disability But still these figures inadequately describe the magnitude of human loss and suffering caused by suicide If one assumes that for every suicidal death there are at least five persons whose lives are profoundly and often for many years affected by the event emotionally socially and economically by the event then each year millions of survivor victims are added to the tens of millions already out there Hence suicide is an ever recurring catastrophe of the first degree It is not a phenomenon that first and foremost forms a dubious privilege of the so called highly developed countries Suicide also occurs in the developing countries and there is more than suggestive evidence that in several of these countries the suicide rate equals or even surpasses the highest national rates shown by official statistics It follows that suicide is an extremely important public health problem It is however a problem that is painfully neglected Throughout the world resources devoted to the prevention of suicide are only a tiny fraction of those devoted to the prevention of comparable problems such as road traffic accidents or to problems of lesser magnitude at least in the industrialized countries such as HIV infection and Aids This volume produced

under the supervision and auspices of the World Health Organization brings together for the first time information on epidemiological clinical and preventive intervention aspects regarding suicide that have global significance and applicability After a detailed description of the epidemiology of suicide and suicidal behaviour on an international scale a large part of the book is devoted to the how to's of developing and organizing suicide prevention programs and services in different national and cultural settings both at clinical and community level In addition a wealth of practical information for health care workers and volunteers is provided on how to evaluate and deal with acute suicide risk Examples of successful preventive intervention programs and projects from the developed as well as the developing world are provided Legal and ethical problems involved in suicide prevention are also discussed Finally both cultural and biological aspects of suicidal behaviour as well as their clinical practice relevance are examined

Understanding Suicide and Its Prevention Federico Sanchez,2010-06 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders

in general and suicide in particular It is the author s fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community s standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnesic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors

Death in the City Kathryn A. Sloan, 2017-04-11 At the turn of the twentieth century many observers considered suicide to be a worldwide social problem that had reached epidemic proportions In Mexico City violent deaths in public spaces were commonplace in a city undergoing rapid modernization Crime rates mounted corpses piled up in the

morgue and the media reported on sensational cases of murder and suicide More troublesome still a compelling death wish appeared to grip women and youth Drawing on a range of sources from judicial records to the popular press *Death in the City* investigates the cultural meanings of self destruction in modern Mexico The author examines responses to suicide and death and disproves the long held belief that Mexicans possess a cavalier attitude toward suffering [Public Health Reports](#),1989

Archives and Emotions Ilaria Scaglia,Valeria Vanesio,2024-11-14 Archives and Emotions argues at its most fundamental level that emotions matter and have always mattered to both the people whose histories are documented by archives and to those working with the documents these contain This is the first study to put archivists and historians scholars and practitioners from different settings geographical provenance and stages of career in conversation with one another to examine the interplay of a broad range of emotions and archives traditional and digital from the eighteenth to the twenty first centuries across national and disciplinary borders Drawing on methodologies from the history of emotions and critical archival studies this book provides an original analysis of two interconnected themes through a selected number of case studies the emotional dynamics affecting the construction and management of archives and the emotions and their effects on the people engaging with them such as archivists researchers and a broad range of communities Its main message is that critically investigating the history and mechanics of emotions including their suppression and exclusion also being conscious of their effects on people and societies is essential to understanding how archives came to hold deep civic and ethical implications for both present and future This study thus establishes a solid base for future scholarship and interdisciplinary collaborations and challenges academic and non academic readers to think work and train new generations differently fully aware that past and present choices have and might again hurt inspire empower or silence
