Sinophiles And Sinophobes Western Views Of China:

The Geopolitics of Red Oil Andrew Stephen Campion, 2016-01-08 Energy security has emerged as one of the most important contemporary geopolitical issues Access to reliable cheap energy has become essential to the functioning of modern economies but the uneven distribution of energy supplies has led to perceptions of significant Western vulnerability At the same time many in the West have become wary of China's re emergence as a major power in global politics with its impact on Western foreign policies and potential threat to Western energy security This book offers fresh insights into the rise of China as a global superpower and the ways in which its rise is perceived to threaten Western energy security engaging specifically with how the idea of the China threat has emerged in popular discourse The author questions how recent US foreign policy has sought to position China as an antagonist to Western energy interests and explores how this image has become the dominant understanding of China by the West Rather than treating these issues as given which orthodox approaches tend to do this book analyses the discursive relationship between US identity foreign policy and energy security which leads to a more nuanced and critical understanding of perceptions of China's potential threat to Western energy security Filling an important gap in the emerging corpus of research on energy security this book will be particularly valuable to students and scholars of Politics International Relations and Chinese Studies

China Mission Studies (1550-1800) Bulletin (as of vol. 11:) **Sino-Western Cultural Relations Journal** Hartmut Walravens, 2020-11-02 The Sino Western Cultural Relations Journal of which 38 fascicles were published between 1979 and 2016 is a mine of information on issues events articles and reviews on the subject It attracted at first a very small constituency of experts in this relatively new field of research at first focusing on the early China Mission but then widening its scope and addressing the whole area of cultural relations between China and the West This journal was edited and financed single handedly by David E Mungello who is known as a historian and an outstanding Leibniz expert SWCRJ published contributions in English German French and Chinese thus also supporting the growing interest in the subject in China The present bibliography provides a complete listing of the contents of the journal and facilitates access by a name and a subject index It is common knowledge that everything of value may be found on the internet but whoever puts this statement to the test will soon find out that everything actually means something Therefore the few serious students of the field will welcome the present modest bibliography

Western Visions of the Far East in a Transpacific Age, 1522-1657 Christina H. Lee, 2016-02-17 Bringing to bear the latest developments across various areas of research and disciplines this collection provides a broad perspective on how Western Europe made sense of a complex multi faceted and by and large Sino centered East and

Southeast Asia The volume covers the transpacific period after Magellan's opening of the transpacific route to the Far East and before the eventual dominance of the region by the British and the Dutch In contrast to the period of the Enlightenment during which Orientalist discourses arose this initial period of encounters and conquest is characterized by an enormous curiosity and a desire to seize not only materially but intellectually the lands and peoples of East Asia The essays investigate European visions of the Far East particularly of China and Japan and examine how and why particular representations of Asians and their cultural practices were constructed revised and adapted Collectively the essays show that images of the Far East were filtered by worldviews that ranged from being on the one hand universalistic and relatively equitable towards cultures to the other extreme unilaterally Eurocentric

Knowledge, Desire and Power in Global Politics Chengxin Pan, 2012-01-01 China threat or China opportunity like beauty is in the eyes of the beholder Western imaginations of China come under close scrutiny in this book in a new philosophical depth seldom attempted before Dr Pan displays in full force his analytical skills and his mastery of knowledge both East and West Contrary to conventional approaches he takes a step back to exercise a powerful reflective process to watch the China watchers with illuminating results Dr Pan's book deserves wide and careful reading Professor Gerald Chan University of Auckland New Zealand The rise of China is largely seen as either a threat or an opportunity Chengxin Pan exposes both of these representations as expressions of Western fears and desires for certainty and predictability His call for a more reflective and culturally sensitive understanding of China offers an important contribution to one of the big political debates of our time Professor Roland Bleiker University of Queensland Australia This is a brilliant and insightful treatment of Western representations of China with a theoretical framework suggesting they come not only from China itself but also the West Although it is not the first treatment of this topic it is innovative in considering the China threat and China opportunity both aspects of the rise of China are of crucial importance for our times With provocative conclusions it is a truly path breaking contribution to the literature I recommend it highly Emeritus Professor Colin Mackerras Griffith University Australia Pan has produced a book which not only challenges some basic assumptions about the nature of China's rise but more importantly forces us to rethink the very basic starting points of how we know what we know about China Professor Shaun Breslin University of Warwick UK How is the rise of China perceived in the West Why is it often labelled as threat and or opportunity What are the implications of these China imageries for global politics Taking up these important questions this groundbreaking book argues that the dominant Western perceptions of China's rise tell us less about China and more about Western self imagination and its desire for certainty Chengxin Pan expertly illustrates how this desire masked as China knowledge is bound up with the political economy of fears and fantasies thereby both informing and complicating foreign policy practice in Sino Western relations Insofar as this vital relationship is shaped not only by China's rise but also by the way we conceptualise its rise this book makes a compelling case for critical reflection on China watching Knowledge Desire and Power in Global Politics is the first systematic and deconstructive analysis of contemporary

Western representation of China's rise Setting itself apart from the mainstream empiricist literature its critical interpretative approach and unconventional and innovative perspective will not only strongly appeal to academics students and the broader reading public but also likely spark debate in the field of Chinese international relations *Representations of China in British Children's Fiction, 1851-1911* Shih-Wen Chen, 2016-04-08 In her extensively researched exploration of China in British children's literature Shih Wen Chen provides a sustained critique of the reductive dichotomies that have limited insight into the cultural and educative role these fictions played in disseminating ideas and knowledge about China Chen considers a range of different genres and types of publication travelogue storybooks historical novels adventure stories and periodicals to demonstrate the diversity of images of China in the Victorian and Edwardian imagination Turning a critical eye on popular and prolific writers such as Anne Bowman William Dalton Edwin Harcourt Burrage Bessie Marchant G A Henty and Charles Gilson Chen shows how Sino-British relations were influential in the representation of China in children's literature challenges the notion that nineteenth century children's literature simply parroted the dominant ideologies of the age and offers insights into how attitudes towards children's relationship with knowledge changed over the course of the century Her book provides a fresh context for understanding how China was constructed in the period from 1851 to 1911 and sheds light on British cultural history and the history and uses of children's literature *China in the 21st Century* Jeffrey N.
