The Six Sigma Manual for Small and Medium Businesses Craig W. Baird, 2009 Six Sigma is a set of practices used to systematically improve processes by eliminating defects which is any nonconformity of a product or service to its specification To be Six Sigma compliant a company must produce no more than 3.4 defects per one million products If this can be achieved a company has the potential to save billions of dollars just as Motorola did The global communications company reported over 17 billion in savings in a recent yearly report and over the past decade companies like Bank of America Caterpillar Honeywell International Raytheon Merrill Lynch and General Electric have implemented the practice However it is much more difficult to implement Six Sigma in small and medium sized businesses but it is becoming increasingly important to do so as larger companies now require their supply bases to be Six Sigma compliant In The Six Sigma Manual for Small and Medium Businesses you will learn about the two main methodologies involved with Six Sigma DMAIC Define Measure Analyze Improve Control and DMADV Define Measure Analyze Design Verify as well as various other methodologies advocated by companies around the world including DCCDI CDOC DCDOV DMADOV DMEDI and IDOV You will also learn about black green and yellow belts the key roles for successful implementation cost savings training responsibilities and terms specific to Six Sigma In addition you will learn how to avoid the common pitfalls and traps found during implementation how to understand the statistical tools and problem solving techniques and how to become certified Also included are detailed examples diagrams and practical exercises to help you master the concepts of Six Sigma Ultimately you will discover how to improve the quality of your processes and products while increasing customer satisfaction and saving billions of dollars The Six Sigma Manual for Small and Medium Businesses is for the company that has already implemented the process an organization who may be considering it students who want
