Philosophy of Religion in the Twenty-First Century D. Phillips, T. Tessin, 2001-10-25 This book offers the rare opportunity to assess within a single volume the leading schools of thought in contemporary philosophy of religion Their exponents seek to meet objections made to their point of view and to relate it to the other schools represented Further discussions between adherents of the different schools make it an ideal text for assessing the deep proximities and divisions which characterize contemporary philosophy of religion The schools of thought represented are Philosophical Theism Reformed Epistemology Wittgensteinianism Postmodernism Critical Theory and Process Thought *Social Stratification* David B. Grusky, 2018-05-04 The book covers the research on economic inequality including the social construction of racial categories the uneven and stalled gender revolution and the role of new educational forms and institutions in generating both equality and inequality

Core Assumptions in Business Theory ,2025-05-08 The modern market based economy generates wealth but it lags on well being it has mastered efficiency but struggles with equity it boasts size but falls short on sustainability In other words our economy delivers performance but neglects progress i e well being equity and sustainability Many rightly call for tighter regulation higher true prices and longer term incentives Others appeal to corporate purpose shared value and stakeholder centrality Beyond regulation and the practice of business we must attend as well to education and the theory of business In particular we must look at business theory s core assumptions whose weaknesses are long known In an applied field such as business where theory tends to be normative flawed assumptions could act as a wedge cleaving apart performance and progress In this volume Subramanian Rangan brings together eminent social scientists and philosophers to explore core assumptions in each of the major fields of business including economics strategy marketing operations decision science leadership governance technology and finance This structured field by field reflection reveals and expands the bounds of our rationality *Core Assumptions in Business Theory* proposes a revised profit function that integrates harm outlines how

economic actors may draw on moral philosophy to enact Pareto equity and not just Pareto efficiency suggests a two stage rationality approach that can attend to well being and recasts marketing as consumer education and not merely demand promotion With an emphasis on education rather than regulation of economic power this volume argues that moral reasoning and moral roles can fruitfully supplement prudential reasoning and functional responsibilities Such an evolution will enable our economy to be both modern and moral This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations **The Palgrave Handbook of the History of Human Sciences** David

McCallum,2022-08-27 The Palgrave Handbook of the History of Human Sciences offers a uniquely comprehensive and global overview of the evolution of ideas concepts and policies within the human sciences Drawn from histories of the social and psychological sciences anthropology the history and philosophy of science and the history of ideas this collection analyses the health and welfare of populations evidence of the changing nature of our local communities cities societies or global movements and studies the way our humanness or human nature undergoes shifts because of broader technological shifts or patterns of living This Handbook serves as an authoritative reference to a vast source of representative scholarly work in interdisciplinary fields a means of understanding patterns of social change and the conduct of institutions as well as the histories of these ways of knowing probe the contexts circumstances and conditions which underpin continuity and change in the way we count analyse and understand ourselves in our different social worlds It reflects a critical scholarly interest in both traditional and emerging concerns on the relations between the biological and social sciences and between these and changes and continuities in societies and conducts as 21st century research moves into new intellectual and geographic territories more diverse fields and global problematics 21st Century Sociology: A Reference Handbook Clifton D. Bryant,Dennis L. Peck,2007 Publisher Description *Future Directions for Heterodox Economics* John T. Harvey,Robert F.
