The Sociology of Social Problems Adam Jamrozik, Luisa Nocella, 1998-07-13 Social problems such as unemployment poverty and drug addiction are a fact of life in industrialised societies This book examines the sociology of social problems from interesting and challenging perspectives It analyses how social problems emerge and are defined as such who takes responsibility for them who is threatened by them and how they are managed solved or ignored The authors examine and critique existing theories of social problems before developing their own theoretical framework Their theory of residualist conversion of social problems explains how certain social problems threaten legitimate power structures so that problems of a social or political nature are transformed into personal problems and the helping professions are left to intervene This book will become a key reference on class inequality and social intervention and an important text for students in sociology and social work courses

Critical Systemic Praxis for Social and Environmental Justice Janet McIntyre-Mills, 2012-12-06

The book develops a practical approach to public policy issues that have continued to be intractable because of a lack of emphasis on transcultural understanding Sustained examples help to increase the readability and the accessibility of theory and methodology The key themes address the issue that Management needs to be more systemic Critical Systemic Praxis is the process whereby we find ways to work across discipline areas and sectoral areas in order to address complex social political economic and environmental problems The way we define and address problems depends on an ability to work with rather than within knowledge areas By introducing the notion of governance we can extend traditional management from an organisational context to an inter organisational context and locate governance as the goal for sustainable social and environmental justice The core aspects of praxis are Respectful listening and dialogue to set up appropriate contexts for participatory design Participatory designs based on participatory action research to map tacit and explicit knowledge of participants professional and ordinary citizens Strategic decision making across discipline areas cultural contexts and knowledge areas Action learning to transfer the policy and practice learnings Mainstreaming the approach to governance in the social political economic and environmental sectors The book develops a systemic approach to public policy issues
