Sociology Of Labour Markets Efficiency Equity Security:

The Sociology of Labour Markets Axel Van den Berg, 1997-01-01 Culture of Prejudice Judith C. Blackwell, Murray E. G. Smith, John S. Sorenson, 2008-09-01 The principal theme of the book is that social science is at its best and most exciting when it confronts and refutes cultures of prejudice intricate systems of beliefs and attitudes that sustain many forms of social oppression and that are themselves sustained by ignorance and fear of the unknown and the unfamiliar **The Cult of Efficiency** Janice Gross Stein, 2002 This thought provoking discourse on the unquestioned pursuit of efficiency reveals how the discussion of efficiency in the delivery of public goods such as education and health care has risen to prominence in postindustrial society Stein s provocative argument reminiscent of the thinking of Lewis Mumford demonstrates that efficiency can too often be a cloak for political agendas and that pressure for efficiency can actually be a detrimental rather than a positive force Citizens in public schools community clinics and hospitals are shown engaging directly with such agendas redrawing the face of the state as they impose new ways of delivering public goods Stein demonstrates how they are calling not only for efficiency but for accountability and choice as they confront the dilemmas of democratic processes in a global age *Families, Labour and Love* Maureen Baker, 2001 Annotation We think of family life as very personal but in fact it is shaped by influences well beyond our control Families Labour and Love identifies the ways in which family and personal life in three settler societies Australia New Zealand and Canada have been shaped by colonization immigration globalization demographic changes law and policy Baker shows that these three countries each a former colony developed similar family trends and similar family policies The family practices of indigenous people were largely overlooked as were those of recent immigrant groups Strongly gendered patterns of paid and unpaid work played a major role in family life Nevertheless local conditions also produced significant differences in family experiences among the three countries Containing numerous examples comparative data and textual sources Families Labour and Love provides a wide ranging analysis of the family that will appeal to students researchers and policy makers BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Restructuring Family Policies** Maureen Baker, 2006-01-01 Recent years have seen significant changes in the social policies of many liberal welfare states this is especially true of social programs for families with children Increasingly governments are making family policy trade offs reducing support for some families but improving it for others Why are such trade offs occurring and how do governments differ in their approach to family social policy This study addresses these questions by examining the political demographic and socio economic factors influencing the restructuring of family related programs in OECD countries Adopting a feminist political economy approach Maureen Baker shows that while some governments encourage their citizens to see children as future resources and promote strong support for reproductive health programs child welfare services women s refugees subsidized childcare and pay equity others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on

income support Ultimately Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports which are increasingly important as global markets reduce economic security for some families while improving the financial situation of others This study also explores strategies employed by states to incorporate or resist international pressures and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines Drawing from nation based research cross national studies and international data bases Restructuring Family Policies successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns *Social Inequality in Canada* James E. Curtis, Edward G. Grabb, L. Neil Guppy, 1999 The purpose of the book is to introduce students to issues of social inequality in Canada It includes a collection of 30 articles which address all of the major aspects of social inequality Topics include social inequality social class social stratification social issues and Canadian Society The book begins from the premise that social inequality entails two broad components objective or structural conditions of social inequality and ideologies that help support these differences

International Labour Documentation International Labour Office. Central Library and Documentation Branch, International Labour Organization. Central Library and Documentation Branch, 1999 *International Labour Review*, 1921 **Women, Work, and Social Rights** Cecilia Benoit, 2000 The text is suitable for upper level sociology courses of work and gender as well as political science and women's studies courses Viewing gender relations in a historical context the book examines the importance of women's roles in both paid and unpaid work with a particular focus on the Canadian experience and its relation to other societies **Social Inequality in Canada** Edward G. Grabb, Neil Guppy, 2008 *Social Inequality in Canada* is a collection of twenty eight articles that cover all of the major aspects of social inequality The text covers two broad components objective or structural conditions of social inequality power poverty and wealth occupations and educational attainment in particular and ideologies that help support these differences Readers who would prefer a more egalitarian society than currently exists in Canada will find reasons for both optimism and pessimism in the research presented here The studies in this collection demonstrate that some types of inequality are generally becoming more marked over time while others have considerably diminished and still more that show little change in recent decades
