

1960s social contexts

- The mid-1960s saw fierce debates about 'permissiveness' in society and on television.
- This was a time of rapid social change. The older 'wartime' generation celebrating the values of duty and perseverance and a younger generation celebrating values of freedom, spontaneity and consumption.
- Programmes like The Avengers were part of that debate as they pushed the boundaries (both social and artistic ones) of their time.
- The glamorous world of the upper middle classes and the world of espionage featured in the news.
- Sexism was mainstream in the 1960s and The Avengers includes sexist references.
- People were also worried about possible attack from international countries as an effect of The Cold War.

Introduction to Sociology James J. Teevan,Warren Edward Hewitt,2005

Family and School Capital: Towards a Context Theory of Students' School Outcomes K. Marjoribanks,2013-03-14 One of the persistent challenges confronting societies is how to reduce inequalities in the educational and occupational attainment of students from different socio economic ethnic and race group backgrounds This book represents a major advance in examining such educational problems From an analysis of international investigations of family and school influences a context theory of students school outcomes is developed This work brings together wonderful summaries of research and ads new insights from the author s own

investigations One of its substantial attributes is that it integrates qualitative and quantitative research orientations and methodologies which is a major step forward in educational and social science research A set of family and school measures is included that might be used by researchers and students as they examine the context theory and by educators involved in school reform programs This book will have a great appeal not only for students and researchers in educational fields but also for scholars in many other social science disciplines

Critical Discourse Studies in Context and Cognition Christopher Hart, 2011-08-17

Critical Discourse Studies CDS is an exciting research enterprise in which scholars are concerned with the discursive reproduction of power and inequality However researchers in CDS are increasingly recognising the need to investigate the cognitive dimensions of discourse and context if they want to fully account for any connection between language legitimisation and social action This book presents a collection of papers in CDS concerned with various ideological discourses Analyses are firmly rooted in linguistics and cognition constitutes a major focus of attention The chapters which are written by prominent researchers in CDS come from a broad range of theoretical perspectives spanning pragmatics cognitive psychology and cognitive linguistics The book is essential reading for anyone working at the cutting edge of CDS and especially for those wishing to explore the central place that cognition must surely hold in the relationship between discourse and society

The Sociocultural Context of

Psychosocial Interventions Francisco José Eiroa-Orosa, Tim Lomas, Michael Rowe, 2018-12-06

Across diverse academic fields scholars and practitioners are engaged in developing interventions to promote outcomes like health and quality of life Indeed such is the apparent efficacy of such interventions that there are many policy led initiatives to implement these at national and international scales However few scholars or practitioners have thought in any systematic and critical way about the importance of contextualizing these interventions i.e. considering how the impact of such interventions may be affected and mediated by specific sociocultural factors from gender to ethnicity and socio economics The aim of the Research Topic The Sociocultural Context of Psychosocial Interventions was to address this lacuna As such we tried to help bringing a

more contextual mindset to the implementation of health and wellbeing interventions This may help to shift the way such interventions are designed and implemented both at a granular local level i e influencing individual practitioners and at a large scale macro level e g influencing policy makers Themes within this Research Topic have concerned both macro sociocultural as well as meso and micro layers and the peculiarities of implementing real world research based on these levels There has been room for physical and mental health for family relationships for educational contexts and even for the effects of crime Some works have included interesting methodological discussions on the integration of different ecological layers or the modal distribution of our interests For us it has been very important to work giving a greater diffusion to these issues since considering psychosocial interventions in the context in which they occur goes beyond an epistemological or methodological discussion Rather these considerations seriously affect the ability of practitioners to really reach the people who need their interventions listening to their needs and respecting their preferences For the editors of this book then the contextualization of interventions means considering the people who receive them as full citizens immersed in complex societies where factors such as social justice and health or well being do not float apart in space but affect each other dialectically We therefore think that the duty of both academics and practitioners is not to forget that it is as important to evaluate the direct effect of our interventions as the influence we have in the society as a whole when we carry them out We hope you enjoy reading these works and that their dissemination stimulates new lines of research committed to both good practise and social transformation

Research on Dictionary Use in the Context of Foreign Language Learning Yukio Tono, 2012-05-10 The purpose of this book is to conceptualise the research on dictionary use within a more general overview of language learning It brings together some of the findings of studies on dictionary users and uses and shows how research into dictionary use can contribute to the improvement of dictionary design and the clarification of issues in language learning The book also provides reports on a series of empirical studies on dictionary use in decoding activities reading comprehension and L2 L1 translation which will shed some light on the nature of the issues discussed throughout the book The book falls into two parts Part I Research on Dictionary Use State of the Art is as its title suggests a summary of previous studies to tease out relevant issues in each area of inquiry Part 2 Empirical Studies reports on a series of studies the author has conducted in the past 15 years The first three studies Chapter 5 6 and 7 investigate dictionary use in the broader context of language learning The next four studies Chapter 8 9 10 and 11 report on a series of controlled experiments on the relationship between the macro and microstructure of the dictionary and reference skills Finally the last two chapters Chapter 12 and 13 report the use of learner language data for a better lexicographical output
