Re-Engineering Software Intensive Systems into Software Product Lines Roberto E. Lopez-Herrejon,Jabier Martinez,Wesley Klewerton Guez Assunção,Tewfik Ziadi,Mathieu Acher,Silvia Vergilio,2022-11-22 This handbook distils the wealth of expertise and knowledge from a large community of researchers and industrial practitioners in Software Product Lines SPLs gained through extensive and rigorous theoretical empirical and applied research It is a timely compilation of well established and cutting edge approaches that can be leveraged by those facing the prevailing and daunting challenge of re engineering their systems into SPLs The selection of chapters provides readers with a wide and diverse perspective that reflects the complementary and varied expertise of the chapter authors This perspective covers the re engineering processes from planning to execution SPLs are families of systems that share common assets allowing a disciplined software reuse The

adoption of SPL practices has shown to enable significant technical and economic benefits for the companies that employ them. However, successful SPLs rarely start from scratch but instead they usually start from a set of existing systems that must undergo well defined re engineering processes to unleash new levels of productivity and competitiveness. Practitioners will benefit from the lessons learned by the community captured in the array of methodological and technological alternatives presented in the chapters of the handbook and will gain the confidence for undertaking their own re engineering challenges. Researchers and educators will find a valuable single entry point to quickly become familiar with the state of the art on the topic and the open research opportunities including undergraduate graduate students and R D engineers who want to have a comprehensive understanding of techniques in reverse engineering and re engineering of variability rich software systems.

Software Product Lines Henk Obbink, Klaus Pohl, 2005-10-03. With SPLC 2005 we celebrated the formation of a new conference series the International Software Product Line Conference SPLC which results from the unification of the former series of three SPLC Software Product Line Conferences launched in 2000 in the USA and the former series of five PFE Product Family Engineering Workshops started in 1996 in Europe. SPLC is now the premier forum for the growing community of software product line practitioners researchers and educators. SPLC offers a unique opportunity to present and discuss the most recent experiences ideas innovations trends and concerns in the area of software product line engineering and to build an international network of product line champions. An international SPLC Steering Committee has been established and it is the wish of this committee that from 2005 on the SPLC conference will be held yearly in Europe America or Asia. The technical program of SPLC 2005 included two keynotes from David Weiss Avaya USA and Jan Bosch Nokia Finland both leading experts with academic and industrial insights 17 full and 3 short research papers organized around the following themes feature modeling re engineering strategies validation scoping and architecture and product derivation eight experience reports describing commercial application of product line practices two panels focused on special topics in product line practice and product line research tool demonstrations a Hall of Fame session that continued the SPLC tradition in a slightly revised format. In addition the technical program was preceded by a tutorial and workshop day that included ten half day tutorials presented by well recognized experts and five workshops on specific areas of product line research.
