Management of Irrigation and Drainage Systems Hector M. Malano, Paul van Hofwegen, 2018-05-02 This monograph provides an overview of the principles required for a service orientation in the management of irrigation and drainage systems The material covered is designed to emphasize an area largely neglected in the irrigation and drainage management literature The dominating philosophy underlying this book is that irrigation and drainage systems must be

managed as a service business responsive to the needs and changing requirements of its customers It is postulated that this service approach to the management of irrigation and drainage systems constitutes a key element of the strategy that is needed to improve the current level of performance of many irrigation and drainage systems worldwide Enhanced performance of irrigation is a prerequisite if we are to face the enormous challenge of producing greater quantities of food to meet the demand of a growing population This is particularly the case in an environment with increasing competition for water from industry and urban water users set against mounting concerns about environmental sustainability Agency and Change Raymond Caldwell, 2006-04-27 This excellent book remaps the limits and possibilities of change clearly shifting the focus from outmoded debates on agency and structure to new practice based discourses on agency and change Offering readers a selective and critical review of key literature and empirical research it will help students contextualize this complex subject area and independently evaluate future prospects for effective change agent roles in organizations Presenting an interdisciplinary exploration of competing discourses the book uses two overarching conceptual continua centred agency decentred agency and systems processes thereby allowing a more intensive focus on agency and change Well written with challenging content this book is essential reading for those interested in the origins development and future prospects for change agency in an organizational world characterized by increasing complexity risk and uncertainty Soils and Fertilizers , 1997-07

Adaptation of Plants to Waterlogging and Hypoxia Najeeb Ullah, Silvia Pampana, Waqar Ahmad , Daniel Kean Yuen Tan, 2024-06-03 Plants like other living organisms require oxygen and water supplies for sustaining their normal growth and development The water requirement is generally met through a coordinated system of root to shoot communication However excessive soil moisture in the rhizosphere can impact normal functioning of plants by restricting oxygen supplies to the roots To survive under hypoxic conditions plants show cellular molecular and functional level adaptations One temporary response could be switching to anaerobic respiration and maintain energy production to some extent via glycolysis and ethanol fermentation However root respiration water and nutrient uptake and hormonal synthesis are severely impacted under sustained periods of oxygen deficiency These belowground changes in turn affect shoot performance and yield formation by interfering with the key physiological processes Bibliography of Southeast Asia Kim See Ch'ng, 2003 The Bibliography of Southeast Asia A Decade of Selected Social Science Publications in the English Language 1990 2000 comprises 6 521 entries of published works The selection broadly represents the documentation of the political economic and social and cultural processes of one of the most interesting eras of the previous millennium
