Solar Energy Application In The Tropics:

Solar Energy Applications in the Tropics B.B.P. Lim, 2012-12-06 Renewable energy sources such as solar energy were advocated even before the energy crisis in 1973 Subsequent development in solar energy has been remarkable Indeed it has been one of the most studied and researched topics in recent years Much of the technology in the utilization of solar energy has been associated with housing and industrial applications and to a smaller extent with commercial use The nature of the utilization has been related to the philosophy of independence or autonomy in that each housing or industrial unit is made self sufficient by the installation of solar energy equipment The general aim of the development of solar energy has been to substitute existing energy sources by solar energy especially among the developed countries in the temperate regions In developing countries the application of solar technology has been more acceptable in rural areas where conventional infrastructure is under developed A different direction is necessary for the development of solar energy in urban areas Buildings are inter related and have been dependent on the conventional infrastructure The consumption of energy is many times more than that in the rural areas A new approach to urban development must be generated and studies should be made on the feasibility and viability of using solar energy for urban settlements

Clean Energy Opportunities in Tropical Countries Shaharin A. Sulaiman, 2021-01-21 This book highlights the present scenario of energy demand and power generation technologies in tropical countries The tropics are well known to receive direct sunlight Furthermore different than four season countries tropical countries have a continuous summer like season and therefore they are rich in clean energy sources like solar and biomass Home to 40% of the world's population the demand for energy in these countries keeps increasing With the present serious global concern on the environment the choice of power generation is no doubt the cleanest possible resources This book delves into the opportunity that various tropical countries have in pursuing environmentally friendly power generation systems

Energy and Environment in the Tropics Shaharin Anwar Sulaiman, 2022-11-21 The tropical zones are dominated by developing countries which mainly face problematic environmental issues Different than four season countries tropical countries have a continuous summer like season and therefore they are rich in clean energy sources like solar and biomass Hence the mitigations of environment and energy issues in the tropics would require specific understanding and different approach to solutions This book offers an assortment of studies on scenarios of environment as well as energy demand and power generation technologies in the tropics Many of the countries within the tropics are highly populated and this results in various problems related to the environment and energy The demand for energy in these countries keeps increasing but concurrently there are also environmental issues that require serious attention As the global concern on the environment is alarming today the choice of power generation should be of the cleanest possible resource This various reports on research activities carried out in the tropics on the aspect of environment and energy presented in this book are highly beneficial for those who like to see an improvement in the tropics
