Solidarity And The Politics Of Anti Politics Opposition And Reform In Poland Since 1968:

Solidarity and the Politics of Anti-Politics David Ost, 1991-08-07 Based on extensive use of primary sources this book provides an analysis of Solidarity from its ideological origins in the Polish new left through the dramatic revolutionary months of 1980-81 and up to the union's remarkable resurgence in 1988-89 when it sat down with the government to negotiate Poland's future David Ost focuses on what Solidarity is trying to accomplish and why it is likely that the movement will succeed He traces the conflict between the ruling Communist Party and the opposition Solidarity's response to it and the resulting reforms Noting that Poland is the one country in the world where radicals of 68 came to be in a position to negotiate with a government about the nature of the political system Ost asks what Poland tells us about the possibility for realizing a new left theory of democracy in the modern world As a Fulbright Fellow at Warsaw University and Polish correspondent for the weekly newspaper *In These Times* during the Solidarity uprising and a frequent visitor to Poland since then David Ost has had access to a great deal of unpublished material on the labor movement Without dwelling on the familiar history of August 1980 he offers some of the unfamiliar subtleties such as the significance of the Szczecin as opposed to the Gdansk Accord and shows how they shaped the budding union's understanding of the conflicts ahead Unique in its attention to the critical formative period following August 1980 this study is the most current and comprehensive analysis of a movement that continues to transform the nature of East European society

Political Action in Václav Havel's Thought Delia Popescu, 2012-01-01 *Political Action in Vaclav Havel's Thought* The Responsibility of Resistance by Delia Popescu explores the Czech dissident's theory of individual opposition resistance to oppression and individual responsibility The book contributes to our understanding of both the extreme circumstances of oppression and to the subversive uses of oppression in modern liberal democracy

Defeating Authoritarian Leaders in Postcommunist Countries Valerie J. Bunce, Sharon L. Wolchik, 2011-06-30 From 1998 to 2005 six elections took place in postcommunist Europe that had the surprising outcome of empowering the opposition and defeating authoritarian incumbents or their designated successors Valerie J Bunce and Sharon L Wolchik compare these unexpected electoral breakthroughs They draw three conclusions First the opposition was victorious because of the hard and creative work of a transnational network composed of local opposition and civil society groups members of the international democracy assistance community and graduates of successful electoral challenges to authoritarian rule in other countries Second the remarkable run of these upset elections reflected the ability of this network to diffuse an ensemble of innovative electoral strategies across state boundaries Finally elections can serve as a powerful mechanism for democratic change This is

especially the case when civil society is strong the transfer of political power is through constitutional means and opposition leaders win with small mandates *Return to Diversity* Joseph Rothschild, Nancy Meriwether Wingfield, 2008 An engaging and straightforward political narrative the book is organised chronologically in a country by country format that makes information easily accessible to students Each section features comments summarising and examining the most important themes of Eastern Europe during the rise and fall of Communism *International Policy Studies Curriculum* Stuart S. Nagel, David Rosenblum, 2006 The basic elements of this book involve integrating five policy problems four developing regions and four fields of knowledge The five policy problems are economic technology social political and legal The four developing regions are Africa Asia East Europe and Latin America The four fields of knowledge are natural science social science humanities and law A part of this book was published as *International Policy Studies A Win Win Curriculum*

International Policy Studies Stuart S. Nagel, David Rosenblum, 2000 The basic elements of this book involve integrating five policy problems and four fields of knowledge The five policy problems are economic technology social political and legal The four developing regions are Africa Asia Eastern Europe and Latin America The four fields of knowledge are natural science social science humanities and law *Pluralizing Humanism* Slavica Jakelić, 2025-02-28 Humanism is appealed to today whenever we want to tackle the conditions of dehumanization in the contemporary world But for humanism to be viable in the twenty first century this book argues it needs to be pluralized Employing theoretical historical and sociological arguments this book moves beyond the discourse of critique It engages theories of religion and secularism as well as postmodern postcolonial and decolonial critiques of Western humanist projects to uncover the ideas and practices of religious and secular humanisms when they challenge dehumanization in the pursuit of conditions of flourishing for all Through studies of the Solidarity movement in Poland and the anti apartheid movement in South Africa the book demonstrates the centrality of humanist traditions to the emergence of religious secular solidarities that transformed the political landscapes of the world By highlighting the instances in which humanisms functioned as checks on each other s absolutist claims the book contends that humanisms supply a constructive path for addressing the challenges of our time a time of radically divided societies and intolerant even violent forms of nationalism A challenge to the critiques of humanism that seek to identify it solely as the legacy of the West as anti religious discourse or relegate it to the domain of power constellations *Pluralizing Humanism* highlights the rich plurality of humanist discourses and the need for their mutual engagements It points to humanist ideals as constitutive of politics that can guide our human power because they are irreducible to it As such this book will appeal to social scientists social theorists religious studies scholars and ethicists with interests in religion secularism social movements and humanist thought and practice *State, Labor, and the Transition to a Market Economy* Agnieszka Paczyńska, 2015-06-19 In response to mounting debt crises and macroeconomic instability in the 1980s many countries in the developing world adopted neoliberal policies promoting the unfettered play of market forces and

deregulation of the economy and attempted large scale structural adjustment including the privatization of public sector industries How much influence did various societal groups have on this transition to a market economy and what explains the variances in interest group influence across countries In this book Agnieszka Paczy ska explores these questions by studying the role of organized labor in the transition process in four countries in different regions the Czech Republic and Poland in eastern Europe Egypt in the Middle East and Mexico in Latin America In Egypt and Poland she shows labor had substantial influence on the process whereas in the Czech Republic and Mexico it did not Her explanation highlights the complex relationship between institutional structures and the critical junctures provided by economic crises revealing that the ability of groups like organized labor to wield influence on reform efforts depends to a great extent on not only their current resources such as financial autonomy and legal prerogatives but also the historical legacies of their past ties to the state This new edition features an epilogue that analyzes the role of organized labor uprisings in 2011 the protests in Egypt the overthrow of Mubarak and the post Mubarak regime

Religious Life in Poland Christopher Garbowski, 2014-02-10 This book provides a concise historical outline of religion in Poland up until its entry into the European Union in 2004 together with a longer presentation of contemporary religious issues Albeit largely mono ethnic and overwhelmingly Catholic after the loss of its large Jewish population to the Holocaust and subsequent post World War II border shifts traces of an historic diversity remain in Poland to date playing a greater role than mere numbers would suggest Poland s fairly robust religious life is affected by the country s continuing modernization and its various institutions and this is discussed within a broad context One of the unfortunate legacies of decades of communism is a stunted civil society while at different levels there are conflicts involving religion at the grassroots it is one of the few forces building much needed trust in present day Polish society
