*Soviet Federalism, Nationalism and Economic Decentralisation* Alastair McAuley, 1991 The failure of the old centralised command economy Soviet state is now clear and universally recognised This is both an appraisal of the legal and constitutional climate in which the crisis is being enacted and a cool undogmatic review of the economic costs and benefits of the present system and of the more likely reforms to the Soviet republics

*The Soviet Union - Federation or Empire?* Tania Raffass, 2012-06-14 The Soviet Union is often characterised as nominally a federation but really an empire liable to break up when individual federal units which were allegedly really subordinate colonial units sought independence This book questions this interpretation revisiting the theory of federation and discussing actual examples of federations such as the United States arguing that many federal unions including the United States are really centralised polities It also discusses the nature of empires nations and how they relate to nation states and empires and the right of secession highlighting the importance of the fact that this was written in to the Soviet constitution It examines the attitude of successive Soviet leaders towards nationalities and the changing attitudes of nationalists towards the Soviet Union Overall it demonstrates that the Soviet attitude to nationalities and federal units was complicated wrestling in a similar way to many other states with difficult questions of how ethno cultural justice can best be delivered in a political unit which is bigger than the national state

*Rethinking Federalism* Karen Knop, Sylvia Ostry, Richard Simeon, Katherine Swinton, 2011-11-01 Federalism is at once a set of institutions the division of public authority between two or more constitutionally defined orders of government and a set of ideas which

underpin such institutions As an idea federalism points us to issues such as shared and divided sovereignty multiple loyalties and identities and governance through multi level institutions Seen in this more complex way federalism is deeply relevant to a wide range of issues facing contemporary societies Global forces economic and social are forcing a rethinking of the role of the central state with power and authority diffusing both downwards to local and state institutions and upwards to supranational bodies Economic restructuring is altering relationships within countries as well as the relationships of countries with each other At a societal level the recent growth of ethnic and regional nationalisms most dramatically in Eastern Europe and the former Soviet Union but also in many other countries in western Europe and North America is forcing a rethinking of the relationship between state and nation and of the meaning and content of citizenship Rethinking Federalism explores the power and relevance of federalism in the contemporary world and provides a wide ranging assessment of its strengths weaknesses and potential in a variety of contexts Interdisciplinary in its approach it brings together leading scholars from law economics sociology and political science many of whom draw on their own extensive involvement in the public policy process Among the contributors each writing with the authority of experience are Tommaso Padoa Schioppa and Jacques Pelkmans on the European Union Paul Chartrand on Aboriginal rights Samuel Beer on North American federalism Alan Cairns on identity and Vsevolod Vasiliev on citizenship after the breakup of the Soviet Union The themes refracted through these different disciplines and political perspectives include nationalism minority protection representation and economic integration The message throughout this volume is that federalism is not enough rights protection and representation are also of fundamental importance in designing multi level governments

The Law and Politics of Engaging De Facto States Benedikt Harzl, 2018-05-08 The secessionist entities that emerged out of the turbulent upheavals in the 1990s in the South Caucasus have over many years and with enormous external assistance successfully defied the jurisdiction of their metropolitan states As entities that have attained a status of de facto statehood they epitomize unresolved conflicts between core principles and doctrines in public international law This study addresses the interplay between law and politics against this context and problematizes false dichotomies that have arguably hindered the transformation of these territorial disputes The author devotes particular attention to different ways of engagement with the de facto states below the level of political endorsement

**Secessionist Entities and International Law** Benedikt C. Harzl, 2025-03-20 This book examines secessionist entities that arose during and after the dissolution process of the USSR and considers them as legal subjects in their own right By employing a novel and more innovative approach the agency of these subjects otherwise often ignored or disregarded is taken into account Drawing on the cases of the South Caucasus the author suggests going beyond the binary concept of statehood and traditional notions of sovereignty He advocates embracing an inclusive reading of international law which enables to foster creative ambiguity vis vis these entities as means of conflict transformation

**Orientalism and Empire** Austin Jersild, 2002-03-12 Orientalism and Empire describes the efforts of imperial integration and incorporation that emerged in the wake of the long

war Jersild discusses religion ethnicity archaeology transcription of languages customary law and the fate of Shamil to illustrate the work of empire builders and the emerging imperial imagination Drawing on both Russian and Georgian materials from Tbilisi he shows how shared cultural concerns between Russians and Georgians were especially important to the formation of the empire in the region      Problems of Democratic Transitions in Multi-Ethnic States Sandy Minsat,2009-06-01 Saw Myat Sandy s study deals with theoretical and empirical analysis of the political transitions in former Yugoslavia and Burma the present day Myanmar It covers the transition period of both states from the late 1980s until present The author examines the democratic transition in both states where the process has been unsuccessfully accomplished i e after a very promising beginning sooner or later undermined by the challenges of the transition which threatened to reverse what was gained by democratisation In this dissertation Saw Myat Sandy argues that the democratic transition in both states became an extended process of transition because of its multi ethnic societies The democratisation in former Yugoslavia led to disintegration and in Myanmar it is proving to be an intractable one and has become almost unresolvable to anyone s satisfaction Myanmar today suffers from on going political instabilities that cause political and social fragmentations but does not demonstrate that it will fall into conventional Balkan scenarios This dissertation analyses if Myanmar s political transition will follow the former Yugoslavian fate by using the transition theoretical framework and highlighting the empirical facts on the problems of ethnicity and other political factors that relate to these democratisation processes The theoretical approaches are based on the democratic transition and consolidation theories argued by Juan J Linz Alfred Stepan and Samuel Huntington As opposed to many quantitative studies relevant dimensions will gradually appear in this qualitative case study The theoretical perspectives that apply are equally significant and supplement each other and relate to its national experience The study contributes to the conventional theoretical debate and aims to offer the understanding for the need to expand the link between ethnicity and political transitions in transition theories It proposes a heuristic method to integrate the dynamic of ethnicity in political transition theories      *The Geography of Nationalism in Russia and the USSR* Robert J. Kaiser,2017-03-14 The Geography of Nationalism in Russia and the USSR is an important addition to the small library of essential works on the collapse of the Soviet empire The first attempt to construct and test broad theoretical propositions about place and territoriality in the making of nations it examines the critical social processes underlying the formation of nations and homelands in Russia and the USSR during the nineteenth and twentieth centuries Robert Kaiser finds that for the most part national self consciousness was only beginning to supplant a localist mentality by the time of World War I The national problem faced by Lenin was fundamentally different from the more difficult nationalist challenge that confronted Gorbachev In Kaiser s place based theory the homeland once created in the imaginations of the indigenous masses powerfully structured national processes and international relations Indigenization from below became an active competitor with nationality policies that promoted Russification resulting in the restructuring of ethnic stratification to

favor indigenes in their own respective home republics and to challenge Russian dominance outside Russia The revolutionary changes occurring since 1989 Kaiser argues should therefore be seen as part of a longer process of indigenization Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
