Russia's Antarctic policy and may yet have on Antarctica itself. In particular it examines the Soviet decision in 1949 in line with the cultural policies of late Stalinism to revise the traditional view of the expedition in order to claim that it was Russian seamen that first sighted the Antarctic mainland in January 1820. This claim remains the official position in Russia today. The author illustrates however that the case for such a claim has never been established and that attempts to make it damaged the work of successive Russian historians. Providing a timely assessment of Russian historiography of the Bellingshausen expedition and examining the connections between the priority claim and national policy goals, this book represents an important contribution to the history of the Antarctic. *Nikolai Bolkhovitinov and American Studies in the USSR* Sergei I. Zhuk, 2020-07-06. This study is an intellectual biography of Nikolai N Bolkhovitinov 1930-2008, the prominent Soviet historian who was a pioneering scholar of US history and US-Russian relations. Alongside the personal history of Bolkhovitinov, this study also examines the broader social, cultural and intellectual developments within the Americanist scholarly community in Soviet and post-Soviet Russia. Using archival documents, numerous studies by Russian and Ukrainian Americanists, various periodicals, personal correspondence, diaries and more than one hundred interviews, it demonstrates how concepts, genealogies and images of modernity shaped a national self-perception of the intellectual elites in both nations during the Cold War. *Soviet Geographical Exploration and Discoveries* Nikolaj A. The notion of a waterway north of Eurasia conceived in the first half of the sixteenth century remained only a dream for centuries due to ice, unmapped coastlines and a lack of geographical knowledge. This volume is the first comprehensive scholarly account in English of the slow but steady exploration and commercial exploitation of the Siberian coastal waters and it proves that this was a truly international endeavour. However, in the end, the Northern Sea Route as a through-traverse route came to be used primarily by the Soviet Union for which it became a crucial vehicle for the geopolitical and economic integration of its vast territories. As an international trade route, the Northern Sea Route is only today about to win its way essentially as a result of global warming. This being the case, should we rejoice or despair? **The Geographical Journal**, 1897. *Exploring and Mapping Alaska* Aleksei Vladimirovich Postnikov, 2015-06-15. Russia first

encountered Alaska in 1741 as part of the most ambitious and expensive expedition of the entire 18th century. During the next 126 years the struggle to develop and refine geographic knowledge of the vast region comprising northeastern Asia, the North Pacific and Alaska met with many obstacles including inclement weather, the chain of supply over great distances, the need to train expert navigators and cartographers and false leads due to spurious voyage accounts. For much of this era critical geographic knowledge was kept as a state secret in Russia and not shared even with the very navigators and cartographers who were developing much needed maps and navigational aids. Despite this a rich cartographic heritage developed to be carried forward into the American era. The traditional Russian cartographic methods were applied to new discoveries in Siberia and beyond. Early fur traders and explorers utilized this system which for a time co-existed with the new cartographic methodology utilized in Europe and adopted for use by the Russia of Peter the Great. It became an age of scientific exploration. Great Britain, France, Spain but especially Russia sent expeditions. An increasingly complete knowledge of the coasts of North America with forays into the interior emerged. Postnikov describes the explorations and richly illustrates how the resulting maps evolved and contributed to the world's knowledge of one of the last great regions of the world to be explored.

The Soviet Academy of Sciences and the Communist Party, 1927-1932 Loren R. Graham, 2015-12-08. No other research organization dominates the field of science in its country to the degree that the Soviet Academy of Sciences does. The coming to power of the Bolsheviks in 1917 presented Russian science with a new governmental attitude toward the place of science in national life. The Soviet Union's first five year plan, the period of this study, was the crucial period for the Academy. During this time the Academy was transformed. Between 1927 and 1932 important decisions were reached by Soviet leaders concerning the organization, control and planning of science, the role of science in the national economy, the position of the individual scientist and the nature of scientific research itself.
