Sowing The Wind Reflections On The Earth's Atmosphere:

Sowing the Wind Louise B. Young, 1990 A description of our atmosphere and its present threats such as acid rain the warming of the earth and the destruction of the ozone layer **Sowing the Wind** Louise B. Young, 1990 **Sowing the Wind** Louise B. Young, 1990 Explores the earth's vulnerability to human byproducts acid ozone depletion the overproduction of fluorocarbons and elucidates the interrelatedness of the global environment Earth in the Balance Al Gore, 2013-09-13 Al Gore leads the charge against climate change the world's greatest threat in an incendiary new foreword to this timeless classic that launched his environmental career If you want to know Gore you need this book **Leadership in Our Society** Roy K. Lintz, 2003-08 **Windswept** Marq de Villiers, 2007-06-12 Examines the dramatic impact on Earth of the wind describing how it controls the weather and planet environment shaped the landscape and transformed human civilization and explores humankind's long struggle to understand and control wind and weather Reprint Kirkus Reviews, 1990 Adult books are categorized by genre i.e. fiction mystery science fiction nonfiction Along with bibliographic information the expected date of publication and the names of literary agents for individual titles are provided Starred reviews serve several functions In the adult section they mark potential bestsellers major promotions book club selections and just very good books in the children's section they denote books of very high quality The unsigned reviews manage to be discerning and sometimes quite critical *Jim Kobak's Kirkus Reviews*, 1990 *The Book Buyer's Advisor* Bill Ott, 1990 **Prentice Hall Exploring Earth Science**, 1997 **Wind** Jan DeBlieu, 1999 Explores the subtle and brutal effects of wind **The Washington Post Index**, 1989 **Reading about the Environment** P. E. Jansma, 1993 Current environmental catastrophes and concerns have been accompanied by an explosion of information about the environment The concerned citizen whether a business professional student homemaker government employee educator or union member needs access to this information but may feel overwhelmed by the bewildering array of material available Don't Breathe the Air Scott Hamilton Dewey, 2000 With the menace of smog hanging over an increasing number of American cities in the 1960s Clean Air became a rallying cry for a new environmentalism Citizen activists rallied passionately to force state and local governments to address problems that threatened human health and even survival In *Don't Breathe the Air* Scott H. Dewey traces the history of air pollution control efforts focusing on the decade of the sixties and describes how local efforts helped create both the modern environmental movement and federal environmental policy Early in the fight against air pollution activists recognized the need for intergovernmental solutions Because air was mobile no single jurisdiction could address problems alone Dewey has chosen three case studies involving different sources of air pollution and different configurations of governments to discover how jurisdictional issues affected environmental organization and the ability to clean up the air First Dewey looks at Los Angeles arguably the birthplace of modern air pollution Because much of the city's air pollution was automobile related Los Angeles had to enlist help from the State of California to regulate both the industry and car owners

Relatively speaking Los Angeles was a success story one that set important precedents and illustrated a pattern of local concerns entailing action in a larger arena Dewey then turns to New York City a city plagued by air pollution problems that involved more than one state and required regional action In its comparative lack of success in dealing with its atmospheric woes compounded by the pollution descending on it from neighboring New Jersey New York was more typical of the overall national pattern than was Los Angeles Finally Dewey examines central Florida where a rural agricultural area suffered from severe industrial air pollution that required a multi jurisdictional solution and a confrontation with influential phosphate manufacturers that all levels of government were long reluctant to tackle Don t Breathe the Air is a comprehensive look at the role of air pollution and citizen activism during the rise of environmentalism in the post World War II United States It clearly lays out the issues and strategies that prepared the way for the federal clean air legislation of the 1970s

The Endangered Atmosphere Marvin S. Soroos,1997 With the Earth s atmosphere increasingly being used as a convenient sink for myriad pollutants humanity faces the daunting problem of conserving a vital resource that like the oceans outer space and Antarctica defies geographical boundary In this comprehensive look at the atmosphere s deterioration an issue that has emerged as a leading international concern Marvin S Soroos considers how it is being altered and degraded by a rapidly growing and industrializing human population and what is being done to preserve it In case studies of four international atmospheric agreements governing atmospheric testing of nuclear weapons acid precipitation ozone layer depletion and global climate change Soroos demonstrates the uneven piecemeal approach that the international community has taken He draws conclusions regarding the circumstances favoring cooperation among states and ponders the likelihood that governments will pursue environmental security in a preventive collaborative way rather than by depending on the self reliant defensive strategies that have proved so costly and counterproductive in the pursuit of military security
