Anja Behrens, 2009-07-22 Research Paper undergraduate from the year 2007 in the subject Business economics Offline Marketing and Online Marketing grade 1 University of Las Palmas de Gran Canaria course Marketing Internacional language English abstract During the last decades wellness tourism has been booming worldwide Stimulated by an increased interest in health and fitness as well as the need to escape from work related stress spa going is now one of the most sophisticated and exciting ways of making holidays in the 21st century Responding to the increasing demand for wellness the tourism industry had to adapt its holiday offers and hotel facilities by creating spa or wellness centres within the hotels and resorts spa or wellness centres which opened in the cities recently are not entering the field of wellness tourism and therefore are not recognized in this report In this report the identification of wellness tourism its development and its trends are the matter of interest After the definition of wellness tourism we will delimit its components and some concepts in close relation In a second step we will explain the international development of wellness tourism which means the underlying mentality changes and its reasons the history and development of wellness tourism and the international expansion of spa The internationalization of wellness tourism will be worked out in the third part by giving information about the most important sending and receiving countries brand philosophies of wellness hotels and international associations of spa and wellness In the last part of the report we will describe trends of wellness tourism related to the overall demand and offer as well as the most significant motives of the wellness tourist choosing a tourist destination

Medical Tourism

Colin

Michael Hall, 2013 Medical and health tourism is a significant area of growth in the export of medical health and tourism services. Although spas and improved well being have long been part of the tourist experience, health tourism now includes travel for medical purposes ranging from cosmetic and dental surgery through to transplants and infertility treatment. Many countries including China, Cuba, Hungary, India, Thailand, Malaysia, and Singapore actively promote and compete for the medical tourist dollar, while many developed countries also provide niche private services. However, the field of medical tourism is increasingly being subject to scrutiny and debate, particularly as a result of concerns over regulatory, ethical, and wider health issues. Drawing on a range of theoretical and methodological perspectives, this book is one of the first to critically address the substantial political, philosophical, and ethical issues that arise out of the transnational practices of medical tourism. Through a series of chapters, the book engages with key issues such as the role of regulatory and policy structures in influencing medical and health tourism related mobilities. These issues are investigated by considering a range of developing and developed countries, medical systems, and health economic perspectives. The book adopts a multi-layered perspective to not only investigate the business and marketing practices of medical and health tourism but places these within a broader framework of contemporary globalisation, policy, and practice. By doing so, it opens up debate of the ethical space in which medical and health tourism operates, as well as reinforces the wide-ranging perspectives that exist on the subject in both the public and academic imagination. This significant contribution will be of interest to students, academics in tourism, and medical policy, trade, and economic development fields.
