

The background of the title screen is a dark, starry space filled with numerous grey, irregularly shaped asteroids of various sizes. In the upper left, a small spaceship with a bright orange and yellow engine flame is flying towards the right. In the lower right, a larger, more complex space station or ship is visible, featuring several rectangular modules and a prominent circular hatch. It has a small orange flame at its base. The entire scene is framed by a thick red border.

Ronald Reagan and the Space Frontier John M.

Logsdon, 2018-11-26 When Ronald Reagan was elected in 1980, limits on NASA funding and the lack of direction under the Nixon and Carter administrations had left the U.S. space program at a crossroads. In contrast to his predecessors, Reagan saw outer space as humanity's final frontier and as an opportunity for global leadership. His optimism and belief in American exceptionalism guided a decade of U.S. activities in space, including bringing the space shuttle into operation, dealing with the 1986 Challenger accident and its aftermath, committing to a permanently crewed space station, encouraging private sector space efforts, and fostering international space partnerships with both U.S. allies and with the Soviet Union. Drawing from a trove of declassified primary source materials and oral history interviews, John M. Logsdon provides the first comprehensive account of Reagan's civilian and commercial space policies during his eight years in the White House. Even as a fiscal conservative who was hesitant to increase NASA's budget, Reagan's enthusiasm for the space program made him perhaps the most pro-space president in American history.

Principles of Clinical Medicine for Space Flight Michael R.

Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition, *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers. It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine. In the intervening few years, the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space. The Second Edition incorporates this information. Gaps in the first edition will be addressed with the addition of new and revised chapters. This edition is extensively peer reviewed and represents the most up-to-date knowledge.

Ascending to Space Maria A. Pozza, 2024-04-22

This book explores multidisciplinary perspectives on critical issues in space from the viewpoints of New Zealand and other nations. It brings together the topics examined at the Otago Foreign Policy School 2022 by both domestic and international experts in the area of space and includes the opening address on space policy delivered by the Minister of Foreign Affairs. This book takes a multidisciplinary approach to New Zealand's growing space sector in conjunction with other nations' perspectives on space. It encompasses space science, military and defence matters, space tourism, and astronaut rescue, and international legal and policy frameworks while taking into account future considerations. Readers such as academics, students, policy advisers, diplomats, government officials, and others engaged in the field of space will find value in this book. It will appeal to think tanks and international institutions grappling with the complexities that are presented by the outer space domain.
