Congress. House. Committee on Science and Technology. Subcommittee on Science, Research, and Technology, 1979 *Law and Policy in the Space Stations' Era* Andrew Young, 1989-05-16 This book addresses the policy implications for all current participants in the Space Station e Era Naturally cooperation on such scale engenders myriad legal difficulties This book divides its discussion of these into three parts dealing with a constitutional perspective of the treaty making process in the space field the optimum framework for management of the US International Space Station and a presentation of the range and complexity of the commercial issues involved The third part of the book deals with the macrocosm within which space station as specific suites of hardware must operate **Scientific and Technical Aerospace Reports** ,1994 *Outer Space: Law, Policy and Governance* ,2013-10-15 In the wake of the euphoria consequent to the Soviet space forays and the US landing on the moon innovative space law evolved rather rapidly in just two decades and then came a stalemate In this hasty growth of nascent space law some gaps remained some inadvertently due to lack of vision and some deliberately due to lack of consensus or because half baked concepts remained pending till the achievement of a better understanding of space phenomena or development of supportive technology These issues have since started jumping to centre stage and this book falls in this niche of deficiencies A few challenges and unresolved contingencies that stare us in the face needing to be addressed suitably are space jurisprudence in jus cogens of space law pointers on policy issues for India hesitancy to incorporate international cooperation in domestic space statutes futility of reiteration of the Convention Law in International Codes of Conduct as soft law adjuncts absence of a legal regimen governing mining on asteroids by private enterprises explication of the concept of Common Heritage of Mankind and modalities for sharing of benefits between nations procedure for nomination of an astronaut as an envoy of mankind in space by name or designation to avoid confusion in the eventuality of multiple astronauts of multiple nationalities all being at one place at the same time et al This book is a modest effort to help resolve issues in that direction *West's Legal Desk Reference* William P. Management: A Bibliography for NASA Managers ,1989 **Earth Observation Data Policy and Europe** Ray Harris, 2021-05-30 Earth observation data policy has received little attention even though the conditions of access to Earth observation data are fundamental to the exploitation of and the further growth of the Earth observation sector This unique book addresses this limitation *The American Bar* ,1999 *The Exploitation of Natural Resources of the Moon and Other Celestial Bodies* Fabio Tronchetti, 2009-10-23 The exploitation of natural resources of the moon and other celestial bodies

represents one of the most fascinating developments in the fields of space law and space related activities The mining and use of extraterrestrial mineral resources may not only contribute to the betterment of conditions of people on earth but may also enable the realization of projects such as those envisaging a permanent human presence on the surface of the moon and other celestial bodies The exploitation of lunar and other celestial bodies resources however requires an appropriate legal framework for it to develop in an orderly and peaceful manner taking into consideration also such broader public concerns as regards security safety and the environment The current legal regime regulating activities in outer space lacks the required specific rules to govern the extraction and use of natural resources of the moon and other celestial bodies once being removed from their original location This book tries to fill this gap by proposing a legal regime aimed at regulating the mining and exploitation of extraterrestrial natural resources for commercial purposes **Management** ,1990
