Space Experiments:

Preparation of Space Experiments Vladimir Pletser, 2020-09-02 This book explains how researchers design prepare develop test and fly their science experiments on microgravity platforms before sending them to space All preparation phases are explained and presented including aircraft parabolic flights as part of spaceflight preparation Twenty international authors all experts in their own microgravity research field contribute to chapters describing their experience to prepare experiments before space flights Fields covered are Physical Sciences and Life Sciences Physical Sciences covers fluid physics vibration effects on diffusion red blood cell dynamics cavitation in microgravity capillary driven flows and material sciences electromagnetic levitator onboard International Space Station Life Sciences includes human physiology sampling earlobe blood human cardiovascular experiments tumours in space and neurophysiology dexterous manipulation of objects in weightlessness

Life Science in Space: Experiments on Board the SJ-10 Recoverable Satellite Enkui Duan, Mian Long, 2019-09-11 This book presents the life science experiments in a space microgravity environment conducted on board the SJ 10 recoverable satellite which was launched on April 6th 2016 and recovered on April 18th 2016 It covers 10 scientific projects in radiation biology gravitational biology and biotechnology that were selected from 100 proposals from various institutions in China and around the world Primarily exploring the rhythm of life in a space microgravity environment all of the experiments conducted on nine payloads of the SJ 10 satellite have never been previously conducted in the respective fields In addition the book provides extensive information on the mission s execution data collection and scientific outcomes

The Impact of Space Experiments on Our Knowledge of the Physics of the Universe Franco Giovannelli, Lola Sabau-Graziati, 2013-03-09 Space experiments have opened practically all electromagnetic windows on the Universe A discussion of the most important results obtained with multi frequency photonic astrophysics experiments will provide new input to advance our knowledge of physics very often in its more extreme conditions A multitude of high quality data across the whole electromagnetic spectrum came at the scientific community s disposal a few years after the beginning of the Space Era With these data we are attempting to explain the physics governing the Universe and its origin which continues to be a matter of the greatest curiosity for humanity In this book we describe the latest steps of the investigations born with the advent of space experiments We highlight the most important results identify unsolved problems and comment on perspectives we can reasonably expect This book aims to provide a useful tool for the reader who is not specialized in space astrophysics and for students Therefore the book is written in the form of a review with a still reasonable length taking into account the complexity of the arguments discussed We do not claim to present a complete picture of the physics governing the Universe but have rather selected particular topics for a more thorough discussion A cross section of essays on historical modern and philosophical topics is offered and combined with personal views into tricks of the space astrophysics trade
