Space In Science Art And Society:

Space François Penz, Gregory Radick, Robert Howell, 2004-03-25 What is space This fascinating journey of exploration begins in our own minds the space within our brains We discover how space is used in sign language and in architecture before moving on to the virtual space created in an imaginary computer generated world The delineation of space has been important throughout human history and we look at how boundaries have been mapped in the past and how they remain politically important today Finally we travel into outer space to look at human exploration and the ultimate nature of space and the universe

Char Davies' Immersive Virtual Art and the Essence of Spatiality Laurie McRobert, 2007-01-01 In this first book length study of the internationally renowned Canadian artist Char Davies Laurie McRobert examines the digital installations *Osmose* and *Eph m re* in the context of Davies artistic and conceptual inspirations Davies originally a painter turned to technology in an effort to create the effect of osmosis between self and world By donning a head mounted display unit and a body vest to monitor breathing and balance participants are immersed in 3D virtual space where they interact with abstract images of nature while manoeuvring in an artificial spatial environment *Char Davies Immersive Virtual Art and the Essence of Spatiality* explores spatiality through a broad scope of disciplines including philosophy mythology biology and visual studies in order to familiarize the reader with virtual reality art how it differs from traditional artistic media and why immersive virtual art promises to expand our imaginative horizons This original study provides us with an important exposition of two of Char Davies acclaimed projects and an exploration of the future impact of digital virtual art on our worldviews

Space, Place and Territory Fabio Duarte, 2017-01-12 Space place and territory are concepts that lie at the core of geography and urban planning environmental studies and sociology Although space place and territory are indeed polysemic and polemic they have particular characteristics that distinguish them from each other They are interdependent but not interchangeable and the differences between them explain how we simultaneously perceive conceive and design multiple spatialities After drawing the conceptual framework of space place and territory the book initially explores how we sense space in the most visceral ways and how the overlay of meanings attached to the sensorial characteristics of space change the way we perceive it smell spatial experiences using electroencephalography and the changing meaning of darkness are discussed The book continues exploring cartographic mapping not as a final outcome but rather as an epistemological tool an instrument of inquiry It follows on how particular ideas of space place and territory are embedded in specific urban proposals from Brasília to the Berlin Wall airports and infiltration of digital technologies in our daily life The book concludes by focusing on spatial practices that challenge the status quo of how we perceive and understand urban spaces from famous artists to anonymous interventions by traceurs and hackers of urban technologies Combining space place and territory as distinctive but interdependent concepts into an epistemological matrix may help us to understand contemporary phenomena and live them critically

Zielinski, Karen Evans, Jan J.C. Seys, Anabela Carvalho, 2022-01-04 Place, Space and Hermeneutics Bruce B.

Janz, 2017-03-29 This book analyzes the hermeneutics of place raising questions about central issues such as textuality dialogue and play It discusses the central figures in the development of hermeneutics and place and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful It covers the range of philosophical hermeneutic theory both within philosophy itself as well as from other disciplines In doing so the volume reflects the state of theorization on these issues and also looks forward to the implications and opportunities that exist Philosophical hermeneutics has fundamentally altered philosophy's approach to place Issues such as how we dwell in place how place is imagined created preserved and lost and how philosophy itself exists in place have become central While there is much research applying hermeneutics to place there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place This book fills that void by offering a sustained analysis of the central elements major figures and disciplinary applications of hermeneutics and place *Transacting Sites of the Liminal Bodily Spaces* Catalina Florina

Florescu, 2011-01-18 This book focuses on liminal bodies and their delicate transaction with themselves and other people's bodies More specifically it explores the spatiality and discourses of the body dying the body opened in surgery or through MRIs CATs and sometimes in autopsies the body preserved through computerized images such as those created by the Visual Human Project the metonymic body that continues to live in another body through organ replacement and the bodily parts cast in silver and then abandoned in a museum This study also analyzes the discourses of the contemporary body commissioned by the vast industry of mass media This type of body has started to direct itself toward frugal almost furtive pleasures consequently unlike those seriously affected by illnesses a body constantly guarded by fear eventually runs on empty becomes a corpse *déjà vu* and thus moves toward different types of minimal and liminal topology The primary works examined include memoirs Marjorie Williams's *Hit by Lightning* A Cancer Memoir Arthur W Frank's *At the Will of the Body* Reflections on Illness Audre Lorde's *The Cancer Journals* films Alejandro Amenábar's *The Sea Inside* Akira Kurosawa's *Ikiru* Pedro Almodóvar's *All about My Mother* stories Marisa Silver's *Night Train to Frankfurt* visual artworks as accomplished by Jo Spence David Wojnarowicz Félix Gonzales Torres and Natalie Horne and plays Bryony Lavery's *Last Easter* Paula Vogel's *Baltimore Waltz* William Hoffman's *As Is* which are read comparatively namely as works positioned at the intersection between literature visual art and social diaries This book has become part of the collections of the world's leading universities Harvard Princeton Columbia the Library of Congress and more **A London Encyclopaedia, Or Universal**
