and Space Administration (NASA), 2018-08-22 Alternative strategies for ballistic missions to Halley's comet in 1985-86 are
described. A large scientific return would be acquired from a ballistic Halley intercept in spite of the high flyby speeds that
are associated with this mission mode. The possibility of retargeting the cometary spacecraft to additional comets after the
Halley intercept also exists. Two cometary spacecraft of identical design would be used to carry out four separate cometary
encounters over a 3 year period. One spacecraft would intercept Halley's comet before its perihelion passage in December
1985 and then go on to comet Borrelly with an encounter in January 1988. The other spacecraft would be targeted for a
postperihelion Halley intercept in March 1986 before proceeding toward an encounter with comet Tempel 2 in September
1988. Farquhar R W and Wooden W H II Goddard Space Flight Center NASA TN D 8453 G 7702 F17 RTOP 186 68 73
