**Fiction Film, Television, and Adaptation** Jay Telotte,Gerald Duchovnay,2011-08-05 While film and television seem to be closely allied screen media our feature films and television series have seldom been successfully adapted across those screens In fact rather than functioning as portals those allied media often seem quite literally screens that filter out something that made the source work so popular in its original form Differences in budget running times cast viewing habits screen size and shape all come into play and this volume s aim is to track a number of popular texts in the course of their adaptive journeys across the screens in order to sketch the workings of that cross media adaptation For its specific examples the volume draws on a single genre science fiction not only because it is one of the most popular today in either film or television but also because it is arguably the most self conscious of contemporary genres and thus one that most obviously frames the terms of these technological adaptations The essays included here mine that reflexive character in both highly successful and in failed efforts at cross media adaption to help us understand what film and television achieve in screening science fiction and to reveal some of the key issues involved in all of our efforts to navigate the various screens that have become part of contemporary culture **Marketing the Moon** David Meerman Scott,Richard Jurek,2014-02-28 One of the
