## **Space Psychology And Psychiatry:**

**Space Psychology and Psychiatry** Nick Kanas, Dietrich Manzey, 2008-04-18 The first edition of this book was voted Winner of the 2004 International Academy of Astronautics Life Sciences Award The second edition deals with psychological psychiatric and psychosocial issues that affect people who live and work in space Unlike other books that focus on anecdotal reports and ground based simulation studies this book emphasizes the findings from psychological research conducted during actual space missions Both authors have been active in such research

**Humans in Space** Nick Kanas, 2015-06-09 Awarded the 2016 International Academy of Astronautics Life Science Book Award Using anecdotal reports from astronauts and cosmonauts and the results from studies conducted in space analog environments on Earth and in the actual space environment this book broadly reviews the various psychosocial issues that affect space travelers Unlike other books that are more technical in format this text is targeted for the general public With the advent of space tourism and the increasing involvement of private enterprise in space there is now a need to explore the impact of space missions on the human psyche and on the interpersonal relationships of the crewmembers Separate chapters of the book deal with psychosocial stressors in space and in space analog environments psychological psychiatric interpersonal and cultural issues pertaining to space missions positive growth enhancing aspects of space travel the crew ground interaction space tourism countermeasures for dealing with space and unique aspects of a trip to Mars the outer solar system and interstellar travel

*Behavioral Health and Human Interactions in Space* Nick Kanas, 2023-02-02 This textbook covers the range of psychological and interpersonal issues that can affect astronauts living and working in space It deals with the three major risk areas cited by NASA's Behavioral Health and Performance Element Behavioral Medicine Team Risk and Sleep Risk Based on the author's more than 50 years of experience in space related activities writing conducting research and teaching undergraduate and graduate courses the book follows a comprehensive range of topics that include cognitive effects psychiatric issues cultural influences salutogenic and positive aspects of space travel autonomy and delayed communication current plans to return to the Moon and Mars analysis of study environments such as the polar regions submersible habitats and space simulation facilities and more It draws on research literature and case studies from the 1950s onward showing readers in a natural and accessible way how the field has progressed over time The book contains ample end of chapter summaries and exercises as well as a complete glossary of key terms As such it will serve students taking courses in aerospace psychology psychiatry sociology human factors medicine and related social sciences in addition to space industry professionals and others interested in the complexities of people living and working in space

Aviation Mental Health Todd Hubbard, Dr Robert Bor, 2012-10-01 This book provides an authoritative and practical guide to the assessment management treatment and care of pilots and other professional groups within aviation covering a range of relevant topics for health and human resources practitioners working in the airline industry Pilot mental health has hitherto been regarded as a specialist topic in aviation medicine Consequently

practitioners and researchers alike have been forced to consult specialist journals or seek out a relevant chapter on this topic in a general textbook to develop or update their understanding of the relevant issues This book seeks to remedy this situation by gathering together all of the relevant insights into a single authoritative source gathered from the leading specialists in the field It aims to cover all of the main relevant issues including the assessment care management and treatment of mental health problems as well as the prevention of mental health problems among this occupational group Integrative Group Therapy for Psychosis Nick Kanas,2020-09-01 Stemming from a series of outcome and process studies this book presents an evidence based integrative group therapy treatment model that includes elements from psychodynamic interpersonal psychoeducational and cognitive behavioral approaches to address the needs of people suffering from psychosis Designed to help patients deal with delusions hallucinations disorganized thinking interpersonal problems mood changes and the stigma of having a serious mental illness the book chronicles the evolution of the integrative approach from research in inpatient and outpatient settings to theoretical and clinical issues that were derived from the empirical studies Chapters also include information and vignettes to assist the reader in conducting therapy groups for patients suffering from psychosis including schizophrenia spectrum and bipolar disorders Shown to be a safe and supportive adjunct to medications that is useful in both inpatient and outpatient settings readers will find value in this unique empirically driven model for groups that are long term short term and time limited *Convergence Mental Health* Harris A. Eyre,Michael Berk,Helen Lavretsky,III Charles Reynolds,2021-01-05 Modern mental health issues are characterized by their complex multi systemic nature and broad societal impact making them poorly suited to siloed approaches of thinking and innovation Convergence science integrates knowledge tools and thought strategies from various fields and is the focal point where novel insights arise Convergence Mental Health presents a blueprint for leveraging convergence science within the context of mental health in order to improve patient outcomes and health care systems On Orbit and Beyond Douglas A. Vakoch,2012-12-20 As we stand poised on the verge of a new era of spaceflight we must rethink every element including the human dimension This book explores some of the contributions of psychology to yesterday s great space race today s orbiter and International Space Station missions and tomorrow s journeys beyond Earth s orbit Early missions into space were typically brief and crews were small often drawn from a single nation As international cooperation in space exploration has increased over the decades the challenges of communicating across cultural boundaries and dealing with interpersonal conflicts have become all the more important requiring different coping skills and sensibilities than the right stuff expected of early astronauts As astronauts travel to asteroids or establish a permanent colony on the Moon with the eventual goal of reaching Mars the duration of expeditions will increase markedly as will the psychosocial stresses Away from their home planet for extended times future spacefarers will need to be increasingly self sufficient while simultaneously dealing with the complexities of heterogeneous multicultural crews *On Orbit and Beyond Psychological Perspectives on Human Spaceflight* the second considerably

expanded edition of *Psychology of Space Exploration Contemporary Research in Historical Perspective* provides an analysis of these and other challenges facing future space explorers while at the same time presenting new empirical research on topics ranging from simulation studies of commercial spaceflights to the psychological benefits of viewing Earth from space. This second edition includes an all new section exploring the challenges astronauts will encounter as they travel to asteroids, Mars, Saturn and the stars requiring an unprecedented level of autonomy. Updated essays discuss the increasingly important role of China in human spaceflight. In addition to examining contemporary psychological research, several of the essays also explicitly address the history of the psychology of space exploration. Leading contributors to the field place the latest theories and empirical findings in historical context by exploring changes in space missions over the past half century as well as reviewing developments in the psychological sciences during the same period. The essays are innovative in their approaches and conclusions, providing novel insights for behavioral researchers and historians alike.

**The New Martians** Nick Kanas, 2013-08-30. The year is 2035 and the crew from the first expedition to Mars is returning to Earth. The crewmembers are anxious to get home and ennui pervades the ship. The mood is broken by a series of mysterious events that jeopardize their safety. Someone or something is threatening the crew. Is it an alien being? A psychotic crewmember? A malfunctioning computer? The truth raises questions about the crewmembers' fate and that of the human race. In this novel, the intent is to show real psychological issues that could affect a crew returning from a long duration mission to Mars. The storyline presents a mystery that keeps the reader guessing, yet the issues at stake are based on the findings from the author's research and other space-related work over the past 40 years. The novel touches on actual plans being discussed for such an expedition as well as notions involving the search for Martian life and panspermia. The underlying science, in particular the psychological, psychiatric, and interpersonal elements, are introduced and discussed by the author in an extensive appendix. Nick Kanas is an Emeritus Professor of Psychiatry at the University of California, San Francisco, where he directed the group therapy training program. For over 20 years he conducted research on group therapy, and for nearly 20 years after that he was the Principal Investigator of NASA-funded research on astronauts and cosmonauts. He is the co-author of *Space Psychology and Psychiatry*, which won the 2004 International Academy of Astronautics Life Science Book Award, and the author of *Humans in Space: The Psychological Hurdles*, which won the 2016 International Academy of Astronautics Life Science Book Award. Dr. Kanas has presented talks on space psychology and on celestial mapping at several regional and Worldcon science fiction conventions. A Fellow of the Royal Astronomical Society, London, he has been an amateur astronomer for over 50 years and is an avid reader of science fiction. He is also the author of two non-fiction books, *Star Maps: History, Artistry, and Cartography* and *Solar System Maps: From Antiquity to the Space Age*, and two science fiction novels, *The New Martians* and *The Protos Mandate*, all published by Springer.

*Space* Peter Merriman, 2022-02-09. *Space* is the first accessible text which provides a comprehensive examination of approaches that have crossed between such diverse fields as philosophy, physics, architecture,

sociology anthropology and geography The text examines the influence of geometry arithmetic natural philosophy empiricism and positivism to the development of spatial thinking as well as focusing on the contributions of phenomenologists existentialists psychologists Marxists and post structuralists to how we occupy live structure and perform spaces and practices of spacing The book emphasises the multiple and partial construction of spaces through the embodied practices of diverse subjects highlighting the contributions of feminists queer theorists anthropologists sociologists and post colonial scholars to academic debates In contrast to contemporary studies which draw a clear line between scientific and particularly quantitative approaches to space and spatiality and more lived human enactments and performances this book highlights the continual influence of different mathematical and philosophical understandings of space and spatiality on everyday western spatial imaginations and registers in the twenty first century Space is possibly the key concept underpinning research in geography as well as being of central importance to scholars and practitioners working across the arts humanities social sciences and physical sciences
