Space Wars:

All Possible Wars? Sam J. Tangredi, 2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997 Because it distills a variety of sources and organizes and compares divergent views this volume makes a unique contribution to the literature It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025 Rather it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards
