Space and Time in Mediterranean Prehistory Stella Souvatzi,Athena Hadji,2013-10-15 Space and Time in Mediterranean Prehistory addresses these two concepts as interrelated rather than as separate categories and as a means for understanding past social relations at different scales The need for this volume was realised through four main observations the ever growing interest in space and spatiality across the social sciences the comparative theoretical and methodological neglect of time and temporality the lack in the existing literature of an explicit and balanced focus on both space and time and the large amount of new information coming from prehistoric Mediterranean It focuses on the active and interactive role of space and time in the production of any social environment drawing equally on contemporary theory and on case studies from Mediterranean prehistory Space and Time in Mediterranean Prehistory seeks to break down the space time continuum often assumed rather than inferred into space time units and to uncover the varying and variable interrelations of space and time in prehistoric societies across the Mediterranean The volume is a response to the

dissatisfaction with traditional views of space and time in prehistory and revisits these concepts to develop a timely integrative conceptual and analytical framework for the study of space and time in archaeology **Lunar Settlements** Haym Benaroya, 2010-02-12 Bringing together some of the most recognized and influential researchers and scientists in various space related disciplines *Lunar Settlements* addresses the many issues that surround the permanent human return to the Moon Numerous international contributors offer their insights into how certain technological physiological and psychological challenges must be met to make permanent lunar settlements possible The book first looks to the past covering the Apollo and Saturn legacies In addition former astronaut and U S Senator Harrison H Schmitt discusses how to maintain deep space exploration and settlement The book then discusses economic aspects such as funding for lunar commerce managing human resources and commercial transportation logistics After examining how cultural elements will fit into habitat design the text explores the physiological psychological and ethical impact of living on a lunar settlement It also describes the planning technical requirements of lunar habitation the design of both manned and modular lunar bases and the protection of lunar habitats against meteoroids Focusing on lunar soil mechanics the book concludes with discussions on lunar concrete terraforming and using greenhouses for agricultural purposes Drawing from the lunar experiences of the six Apollo landing missions to the many American and Soviet robotic missions to current space activities and research this volume summarizes the problems prospects and practicality of enduring lunar settlements It reflects the key disciplines including engineering physics architecture psychology biology and anthropology that will play significant roles in establishing these settlements *The Curator's Handbook: Museums, Commercial Galleries, Independent Spaces* Adrian George, 2024-11-12 An updated edition of this essential practical handbook for all those involved in or studying the dynamic field of curating From pitching your ideas and writing loan requests to working with artists lenders and art handlers from writing interpretation material to installing and promoting your exhibition *The Curator's Handbook* is the most clear and complete guide yet to the art and practice of curating An introduction maps the history of curating from its origins in the seventeenth century to the multifarious roles of the curator today tastemaker custodian interpreter educator facilitator and organizer Adrian George then guides the reader across thirteen chapters through the process of curating an exhibition Each step is described in valuable detail and clear informative language by this experienced curator whose text pinpoints the keys to success as well as which pitfalls to avoid With advice and tips from a renowned cast of international museum directors and curators including Daniel Birnbaum Aric Chen Elizabeth Ann Macgregor Hans Ulrich Obrist Jennifer Russell and Nicholas Serota this new edition updated to reflect on current concerns in the art world and the latest recommended best practices is the essential handbook for all students museum and gallery professionals and established or aspiring curators

Common Ground? Anthony M. Orum, Zachary Neal, 2009-09-10 Public spaces have long been the focus of urban social activity but investigations of how public space works often adopt only one of several possible perspectives which restricts the questions that can be asked and the answers that can be considered In this volume Anthony Orum and Zachary Neal explore how public space can be a facilitator of civil order a site for power and resistance and a stage for art theatre and performance They bring together these frequently unconnected models for understanding public space collecting classic and contemporary readings that illustrate each and synthesizing them in a series of original essays Throughout they offer questions to provoke discussion and conclude with thoughts on how these models can be combined by future scholars of public space to yield more comprehensive understanding of how public space works
