Dark Moon Mary Bennett, David S. Percy, 2001 As the dust settles on the 30th anniversary of Apollo 11 information is now coming to light that throws into serious doubt the authenticity of the Apollo record New evidence clearly suggests that NASA hoaxed the photographs taken on the surface of the Moon These disturbing findings are supported by detailed analysis of the Apollo images by professional photographer David S Percy ARPS and physicist David Groves PhD The numerous inconsistencies clearly visible in the Apollo photographic account are quite irrefutable Recent research indicates that the errors evidenced in DARK MOON were deliberately planted by individuals determined to leave clues to the faking in which they were unwillingly involved DARK MOON is the answer to the question did the Apollo missions really land a man on the Moon and return him alive and well to Earth or is the record incorrect
