Jones, 2025-08-13 This book is the first comprehensive overview of the history of female presenting AI and robots in US and UK live action science fiction films from 1949 to 2023 It offers an original taxonomy that aids in the examination of 80 films and over 135 characters representations starting with *The Perfect Woman* 1949 and ending with *Robots* 2023 Using its representational taxonomy this book analyses the evolution of these depictions showing the continuations revisions and shifts in the depiction of female presenting AI and robots from objectified eroticised subordinated things to being autonomous moral agents who assert their right to equality and refuse their abusive typically sexual use This book shows how these fictional gendered constructions are products of a heterosexual cisgender male fantasy of an idealised subordinated form of femininity These artificial characters along with their real world counterparts highlight a desire for a subordinated femininity but also show how that subordination is a social construction often reinforced and countered in onscreen depictions By examining the trends within its asserted Galatea Girlfriend Mother and Deadly Seductress types this book presents an exploration of what our female presenting artificial creations could be while addressing their contemporary and our current AI technologies and how science fiction is influencing real life while our reality seeks to mirror science fiction **Fire and Snow** Marc DiPaolo, 2018-07-11 Fellow Inklings J R R Tolkien and C S Lewis may have belonged to different branches of Christianity but they both made use of a faith based environmentalist ethic to counter the mid twentieth century's triple threats of fascism utilitarianism and industrial capitalism In *Fire and Snow* Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian

Disinformation Donald A. Barclay, 2022-04-15 Does the idea of a world in which facts mean nothing cause anxiety Fear Maybe even paranoia Disinformation The Nature of Facts and Lies in the Post Truth Era cannot cure all the ills of a post truth world but by demonstrating how the emergence of digital technology into everyday life has knitted together a number of seemingly loosely related forces historical psychological economic and culture to create the post truth culture Disinformation will help you better understand how we got to where we now are see how we can move beyond a culture in which facts are too easily dismissed and develop a few highly practical skills for separating truth from lies Disinformation explains How human psychology the very way our brains work can leave us vulnerable to disinformation How the early visions of what a global computer network would and should be unintentionally laid the groundwork for the current post truth culture The ways in which truth is twisted and misrepresented via propaganda and conspiracy theories How new technology not only spreads disinformation but may also be changing the way we think The ways in which the economics of information and the powerful influence of popular culture have contributed to the creation of the post truth culture Unlike the far too numerous one sided politically ideological treatments of the post truth culture Disinformation does not seek to point the finger of blame at any individuals or groups instead its focus is on how a number of disparate forces have influenced human behaviors during a time when all of humanity is struggling to better understand and more effectively control for better or worse challenging new technologies that are straining the limits of human intellectual and emotional capacity
