Spaceship Titanic:

Spaceship Titanic Richard Duprey, Brian O'Leary, 1983 Douglas Adams's Starship Titanic Terry Jones, 2007-12-18 In this thoroughly satisfying and completely disorienting novel based on a story line by Douglas Adams author of *The Hitchhiker's Guide to the Galaxy* Terry Jones recounts an unforgettable tale of intergalactic travel and mishap The saga of the ship that cannot possibly go wrong sparkles with wit danger and confusion that will keep readers guessing which reality they are in and how on earth to find their way out again At the center of the galaxy a vast unknown civilization is preparing for an event of epic proportions the launching of the greatest most gorgeous most technologically advanced Starship ever built the Starship Titanic An earthling would see it as a mixture of the Chrysler Building the tomb of Tutankhamen and Venice But less provincial onlookers would recognize it as the design of Leovinus the galaxy's most renowned architect He is an old man now and the creation of the Starship Titanic is the pinnacle achievement of his twenty year career The night before the launch Leovinus is prowling around the ship having a last little look With mounting alarm he begins to find things are not right unfinished workmanship cybersystems not working correctly robots colliding with doors How could this have happened And how could this have happened without his knowing Something somewhere is terribly wrong On the following day in an artificial event staged for the media the Starship Titanic will leave its construction dock under autopilot and a few days later make its way to the terminal to pick up passengers for its maiden voyage Although the ship will be deserted during its very first flight it is nevertheless a major event watched by all the galaxy's media Hugely magnificently the fabulous ship eases its way forward from the construction dock picks up speed sways a bit wobbles a bit veers wildly and just before it can do massive damage to everything around it appears to undergo SMEF Spontaneous Massive Existence Failure In just ten seconds the whole stupendous enterprise is over And our story has just begun Somehow three earthlings one Blerontin journalist a semideranged parrot and a shipful of disoriented robots must overcome their differences It's the only way to save the Starship Titanic The Ship That Cannot Possibly Go Wrong from certain destruction and rescue the economy of an entire planet not to mention to survive the latest threat an attack by a swarm of hostile shipbuilders Douglas Adams's Starship Titanic Terry Jones, 1998 Seconds after its initial launch Starship Titanic undergoes SMEF Spontaneous Massive Existence Failure and vanishes only to mysteriously turn up at the home of Dan and Lucy Gibson residents of a remote little known planet called Earth Reprint **Titanic** Rupert Matthews, 2022-10-01 The sinking of the Titanic on its maiden voyage in 1912 is one of the most dramatic stories in maritime history The largest passenger steamship in the world fitted with more advanced safety features than any of her rivals she was proclaimed to be virtually unsinkable Just how and why the Titanic foundered on such a beautiful April evening is the subject of this fascinating book Author Rupert Matthews has written a highly readable account of the story of the Titanic from the building of the liner to the excitement surrounding her launch the slow unfolding of an unimaginable tragedy the investigations and finally the discovery of the wreck He also explores the

Global Warming: The Answer Wilfred Candler, 2007-11-02 Global Warming The Answer takes as given that global warming is man made and occurring with increasingly adverse effects. After a brief review of the carbon cycle and how man is disturbing it, the book argues that global warming is an economic problem. Given the right prices, technical solutions will follow. After looking at the limited solutions for personal virtue in reducing pollution, the book examines the chimera of a carbon neutral life style and necessity to achieve a fossil free economy. Cap and Trade is shown to involve huge wealth transfers to established polluters and is thus rejected in favor of a revenue neutral carbon tax. More specifically, an initial carbon tax of 250 ton with the revenue returned to the public through lowered payroll taxes in the U S or V A T or sales taxes elsewhere. Existing and pending technologies that will take off once fossil fuels are taxed are reviewed as are ancillary policies in support of the carbon tax. Some suggestions are offered for increasing international collaboration. It is emphasized, however, that to date no significant action has been taken to combat global warming. Kyoto, higher mileage requirements and An Inconvenient Truth notwithstanding, action is urgent. But first, the public have to understand the answer to global warming.

Douglas Adams's Starship Titanic Douglas Adams, Terry Jones, 2023-08-08 From the minds of Douglas Adams, The Hitchhiker's Guide to the Galaxy and Terry Jones, Monty Python comes Starship Titanic, the hilarious novelization of the third best adventure game of 1999. Welcome on board the Starship Titanic, The Ship that Cannot Possibly Go Wrong. At the centre of the galaxy, a vast unknown civilization is preparing for an event of epic proportions, the launch of the greatest, most gorgeous, most technologically advanced spaceship ever built, the Starship Titanic. An Earthling would see the ship as something really, really big, but rather less provincial onlookers would recognize it as the design of Leovinus, the galaxy's most renowned architect. Before the launch, Leovinus is having one last little look round and begins to find that things just aren't right. Poor workmanship, cybersystems out of control, robots walking into doors. How could this have happened? The following morning, while the galaxy's media looks on, the fabulous ship eases away from the construction dock, picks up speed, sways a little, wobbles a bit, veers wildly and just before it can do untold damage to everything around it, appears to undergo SMEF (Spontaneous Massive Existence Failure). In just ten seconds, the whole stupendous enterprise is over. And our story has just begun.

Science Fiction and Posthumanism in the Anthropocene Jonathan Hay, 2024-12-26 With science fiction stories imagining futures and worlds vastly different from our own and posthuman philosophies radically reconceptualising our species' place within our own world, this book is a deep dive into the similarities between science fiction studies and critical posthumanism and how they can be read together. Both fields fantasise about future technologies, envisage alienness through conversation with everyday life and both anticipate the Anthropocene as a dire source of rupture from the present. Drawing inspiration from these and other consonances, this book establishes a common theoretical ground between the two fields.

upon which the two currents of future oriented thought can meet and begin to share a common language An investigation that draws critical currency from the everyday condition of our species in relation to technology and our perilous situation in the Anthropocene the book observes posthumanism not just as a theoretical framework that may be applied to science fictional ideas but also as an integral part of how it is that science fiction is generated Featuring case studies of the work of prominent authors Isaac Asimov Ursula K Le Guin and Kim Stanley Robinson alongside the BBC television series Doctor Who and the cult videogame Outer Wilds Science Fiction and Posthumanism in the Anthropocene formulates a new critical paradigm which recognises the value of such works to posthumanist thought Addressing those with an interest in either academic discipline it demonstrates that urgent discourses around our shared future are more imperative now than ever before
