**National Library**

**of Medicine Current Catalog** National Library of Medicine (U.S.), The Pictorial World of the Child Maureen Cox, 2005-11-17 This lavishly illustrated book gives a comprehensive and scholarly account of children's understanding and appreciation of art and their developing ability to produce their own pictures. It discusses the main influences on children's picture making and considers the intriguing question: does children's art follow the same pattern of development as the history of art? As well as discussing the artistic development of typically developing children, the book also includes a discussion of children with intellectual disabilities and those with a talent for art, some of whom are children with autism.

*Event Theory* Irene Fast, Robert E. Erard, Carol J. Fitzpatrick, Anne E. Thompson, Linda Young, 2013-12-19 First published in 1985, Routledge is an imprint of Taylor & Francis, an informal company. Rethinking Linguistic Relativity John J. Gumperz, Stephen C. Levinson, 1996-07-11 Linguistic relativity is the claim that culture through language affects the way in which we think and especially our classification of the experienced world. This book reexamines ideas about linguistic relativity in the light of new evidence and changes in theoretical climate. The editors have provided a substantial introduction that summarizes changes in thinking about the Sapir-Whorf hypothesis in the light of developments in anthropology, linguistics, and cognitive science. Introductions to each section will be of especial use to students. Children's Drawings of the Human Figure Maureen V. Cox, 2013-05-24 The human figure is one of the earliest topics drawn by the young child and remains popular throughout childhood and into adolescence. When it first emerges, however, the human figure in the child's drawing is very bizarre; it appears to have no torso and its arms, if indeed it has any, are attached to its head. Even when the figure begins to look more conventional, the child must still contend with a variety of problems, for instance, how to draw the head and body in the right proportions and how to draw the figure in action. In this book, Maureen Cox traces the development of the human form in children's drawings; she reviews the literature in the field, criticises a number of major theories which purport to explain the developing child's drawing skills, and also presents new data. **Functional Features**

**in Language and Space** Laura Carlson, Laura Anne Carlson, Emile van der Zee, 2005 The language and space area is a relatively new research area in cognitive science. Studying how language and spatial representation are linked in the human brain mainly draws on research in existing disciplines focusing on language perception, categorization, and development. Representative researchers from these sub-disciplines of cognitive science discuss new insights in their own field of expertise and show what role their definition of function feature or functional feature plays in their research. New research centered around these concepts is on the forefront of developments in these sub-disciplines and in the area of Language and Space.

*Building Information Modeling in Pedagogy and Practice* Anne K. Anderson, Kevin R. Miller, David E. Gunderson, 2025-08-11 The adoption of building information modeling (BIM) in both pedagogy and practice has experienced significant growth in the past decade. As the use of BIM is being quantitatively and qualitatively shown to improve project outcomes, many educators and practitioners are still struggling with how to incorporate BIM into curriculum training and

current and future projects This book is a compilation of the best academic and research articles on the topic of BIM provides a resource for both educators and practitioners for understanding issues regarding BIM covers BIM topics such as BIM Execution Planning Collaboration Visualization Site Utilization Planning Safety Estimating Sequencing Coordination Clash Detections Integrated Project Delivery Legal considerations for BIM Industry Uses of BIM Sustainability Facilities Management Interoperability Modular Construction and Virtual Reality and includes a new introduction and conclusion Building Information Modeling in Pedagogy and Practice will be an invaluable resource for engaged academics and teaching practitioners interested in playing a key role in the future development of the building profession as well as undergraduate and postgraduate students wishing to understand the importance of BIM Most of the chapters in this book were originally published in the International Journal of Construction Education and Research
