As the world s population continues to expand maintaining and indeed increasing agricultural productivity is more important than ever though it is also more difficult than ever in the face of changing weather patterns that in some cases are leading to aridity and desertification The absence of scientific soil inventories especially in arid areas leads to mistaken decisions about soil use that in the end reduce a region s capacity to feed its population or to guarantee a clean water supply Greater efficiency in soil use is possible when these resources are properly classified using international standards Focusing on arid regions this volume details soil classification from many countries It is only once this information is properly assimilated by policymakers it becomes a foundation for informed decisions in land use planning for rational and sustainable uses Environmental Applications of Remote Sensing and GIS in Libya Hamdi A. Zurqani,2022-06-29 This book addresses the environmental challenges that Libya and similar countries in the regions are currently facing Each chapter of this book provides a methodology using remote sensing RS and geographical information systems GIS dealing with one of these environmental challenges such as monitoring and mapping soil salinity and prediction of soil properties monitoring and mapping of land degradation spatiotemporal land use cover agricultural drought monitoring hydrological applications such as spatial rainfall distribution surface runoff geo morphometric analysis flood hazard assessment and mapping hydrologic and hydraulic modeling pollution hazard assessment and climate related geophysical processes This book also assesses the impacts of climate change on natural resources using both RS and GIS as well as other applications covering different parts of Libya This book is beneficial for graduate students researchers policy planners and stakeholders in Libya as well as other countries that share similar environmental issues Also the methodologies followed in the book s chapters can be applied to any other regions around the world with similar landscapes and climatic conditions Managing Human and Social Systems Brian D.
