

WHAT IS SOCIOLOGY?

Sociology is the study of the development, structure, and functioning of human society.

Sociologists investigate the structure of groups, organizations, and societies, and how people interact within these contexts.

*Examples of **sociology** include studying the relationship between culture and society, examining social movements, or researching how communication affects human behavior.*

Sociology The Science Of Human Organization

Jonathan H. Turner

Sociology The Science Of Human Organization:

Sociology Richard L. Dukes, Sandra Matthews, 1984-03-01 **Sociology** Jonathan H. Turner, 1985 Theoretical
Sociology Jonathan H. Turner, 2013 Written by award winning scholar Jonathan Turner Theoretical Sociology 1830 to the Present is a monumental book that offers in depth and comprehensive coverage of both the classical and modern traditions in sociological theory The text is divided into three key parts Part 1 provides detailed analyses of the theories of the classical tradition including the works of August Comte Herbert Spencer Karl Marx Max Weber Georg Simmel Emile Durkheim and George Herbert Mead Part 2 examines all of the principle theoretical traditions in sociology during the modern era including the functional general systems ecological evolutionary conflict exchange symbolic interactionist role and status dramaturgical phenomenological structuralist cultural postmodern European critical and American style critical theories Part 3 reviews the state of sociological theory today including scientific elements of theory and how to overcome roadblocks that have prevented sociological theories from realizing their full explanatory power **Contemporary Sociological Theory**
Jonathan H. Turner, 2012-09-20 Written by award winning scholar Jonathan Turner Contemporary Sociological Theory covers the range of diversity of theory in nine theoretical traditions and variants of theoretical approaches in these traditions The result is a comprehensive review of present day theorizing in sociology covering functional evolutionary ecological conflict interactionist exchange structuralist cultural and critical theories and the major proponents of these theories Moreover for each theoretical tradition its origins are examined in a separate chapter with an eye to how classical theorists influenced the work of key contemporary scholars This book will serve as a valuable resource for those readers seeking in depth and comprehensive coverage of contemporary traditions in their historical contexts Unlike many texts coverage is comprehensive and deep The theories and their origins are examined in detail so that readers can fully understand the origins and present profile of theories in present day sociology Unlike many texts that skim over theories on the surface this book seeks to unlock for the reader their underlying structure of each theory The book is written in a modular format so that theories and traditions can be examined in any order and in many diverse combinations If desired only the contemporary theories can be read without attention to their historical contexts or the reverse is true if readers want to understand the historical origins of a particular theoretical tradition Since Jonathan Turner is an active theorist in his own right he brings to the book an appreciation of how theories are created as an insider rather than as only a commentator on theory As such he is able to bring out the underlying assumptions structure and form of a theory in new and interesting ways for casual readers and scholars alike *The Neuroscience of Organizational Behavior* Constant D. Beugré, 2018-04-27 The Neuroscience of Organizational Behavior establishes the scientific foundations of organizational neuroscience a nascent discipline that explores the neural correlates of human behavior in organizations The book draws from several disciplines including the organizational sciences neuroeconomics cognitive psychology social cognitive neuroscience and neuroscience The topics

discussed include the neural foundations of organizational phenomena such as decision making leadership fairness trust and cooperation emotions ethics and morality unconscious bias and diversity in the workplace
