The Clean Energy Transition Daniel J. Fiorino,2022-09-12 Is the goal of a transition to clean energy at all realistic If so how could it be accomplished Climate change poses a formidable challenge for twenty first century governments Unless they can move to a clean energy system built on efficiency renewables electrification and possibly complementary technologies like nuclear energy and carbon capture and storage it will be all but impossible to avoid the worst impacts of climate change In this book Daniel Fiorino provides a comprehensive introduction to the politics and policies of a clean energy transition and how it may unfold nationally and globally Across its nine chapters he explores the current energy landscape and the different pathways and pitfalls on the road to decarbonization All scenarios for decarbonizing he argues rely on aggressive efficiency the rapid scale up of renewables and the electrification of most of what is left Yet this transition has to be accelerated and done effectively There is little time left for second chances if we are to decarbonize later this century The Clean Energy Transition will be an indispensable resource for students of energy politics environmental studies and public policy as well as anyone interested in the energy issues of the day
