The US Military Profession into the 21st Century Sam Sarkesian, Robert Connor, 2006-04-18 This brand new edition of *The US Military Profession into the Twenty First Century* re examines the challenges faced by the military profession in the aftermath of the international terrorist attack on the United States on September 11 2001 While many of the issues facing the military profession examined in the first edition remain the new war and international terrorism have compounded the challenges The US military must respond to the changed domestic and strategic landscapes without diminishing its primary function a function that now many see that goes beyond success on the battlefield Not only has this complicated the problem of reconciling the military professional ethos and *raison d'etre* with civilian control in a democracy it challenges traditional military professionalism This book also studies the notion of a US military stretched thin and relying more heavily on the US Federal Reserves and National Guard These developments make the US military profession increasingly linked to public attitudes and political perspectives In sum the challenge faced by the US military profession can be termed a dual dilemma It must respond effectively to the twenty first century strategic landscape while undergoing the revolution in military affairs and transformation At the same time the military profession must insure that it remains compatible with civilian cultures and the US political social system without eroding its primary function This is an invaluable book for all students with an interest in the US Military and of strategic studies and military history in general

Humanizing Our Global Order Ivan L. Head, 2003-01-01 Hunger disease poverty environmental insecurity illegitimate governance civil war and international conflict are only a few of the causes of today's global turmoil and gross human suffering Written in honour of Ivan Head foreign affairs advisor to former Prime Minister Pierre Trudeau past president of Canada's International Development Research Centre and professor emeritus of International law at the University of British Columbia this collection of distinguished essays addresses the imperative to enhance human dignity and protect human life by humanizing our global order and improving international relations goals Professor Head strove for throughout his career The authors argue that the search for possible solutions to these challenges which has so far tended to proceed without due recognition of the needs demands and solutions that emanate from the geo political South must in

future be conducted with alternate visions that take these factors into account Each essay seeks to re assess and re imagine a specific topic that relates in some significant way to our current global circumstance in ways that advance the book s thematic With essays grappling with such issues as Multilateral Environmental Agreements the Use of Force the Prevention of Civil War through Minority Protection Common Heritage of Humankind and the Civil Dimensions of Strategy the volume deals with a range of diverse topics that are as crucial as they are topical Soldiers, Peasants, and Bureaucrats Roman Kolkowicz, Andrzej Korbonski, 2021-01-26 This book first published in 1981 is a comprehensive examination of the main theoretical methodological and empirical approaches to the study of the military in modernising political systems in socialist and non socialist countries It analyses civil military relations in the Middle East Eastern Europe and China and in doing so sheds new light on the comparative politics and strategic affairs of the Cold War period *Israel's Civil-Military Relations and Security Sector Reform* Ian Westerman, 2024-02-13 This book examines Israel s civil military relations CMR in order to explore alternatives to orthodox Western models of security sector reform SSR in post conflict societies This book argues that the guidelines of SSR have always tended to draw on theoretical work in the field of CMR and focus too heavily on Western liberal democratic models of governance Consequently reform programs based on these guidelines and intended for use in post conflict and conflict affected states have had at best mixed results The book challenges the necessity for this over reliance on traditional Western liberal democratic solutions and instead advocates an alternative approach It proposes that by drawing on an unconventional CMR model that in turn references the specific context and cultural background of the particular state being subject to reform there is a significantly higher chance of success Drawing on a case study of Israel s CMR the author seeks to provide practical assistance to those working in this area and considers the question of how this unorthodox CMR model might usefully inform post conflict and conflict affected SSR programmes This book will be of interest to students of military studies security studies Israeli politics and International Relations U.S. Army War College Guide to National Security Policy and Strategy J.
