Glasnost in Jeopardy, 1991 **Psychiatric Ethics** Sidney Bloch, Stephen A. Green, 2021-01-05 Ethical issues inherent in psychiatric research and clinical practice are invariably complex and multi faceted Well reasoned ethical decision making is essential to deal effectively with patients and promote optimal patient care Drawing on the positive reception of Psychiatric Ethics since its first publication in 1981 this highly anticipated 5th edition offers psychiatrists and other mental health professionals a coherent guide to dealing with the diverse ethical issues that challenge them This edition has been substantially updated to reflect the many changes that have occurred in the field during the past decade Its 25 chapters are grouped into three sections which cover 1 clinical practice in child and adolescent psychiatry consultation liaison psychiatry psychogeriatrics community psychiatry and forensic psychiatry 2 relevant basic sciences such as neuroethics and genetics and 3 philosophical and social contexts including the history of ethics in psychiatry and the nature of professionalism Principal aspects of clinical practice in general such as confidentiality boundary violations and involuntary treatment are covered comprehensively as is a new chapter on diagnosis Given the contributors expertise in their respective fields Psychiatric Ethics will undoubtedly continue to serve as a significant resource for all mental health professionals whatever the role they play in psychiatry It will also benefit students of moral philosophy in their professional pursuits No Asylum Thomas A. Oleszczuk, Theresa C. Smith, 2016-07-27 No Asylum is a quantitative assessment of the incidence of state repression via the peculiar institution of forced psychiatric hospitalization of evidently healthy Soviet dissidents The book explains who was targeted and why as the State used psychiatry to attempt to deflect defuse discredit or destroy the

multifaceted dissident movement Although new detentions virtually ceased as the Union fragmented it is too early to write an epitaph for psychiatric abuse political use of psychiatry could be revived in Russia British Human Rights Organizations and Soviet Dissent, 1965-1985 Mark Hurst, 2016-05-05 In the latter half of the 20th century a number of dissidents engaged in a series of campaigns against the Soviet authorities and as a result were subjected to an array of cruel and violent punishments A collection of like minded activists in Britain campaigned on their behalf and formed a variety of organizations to publicise their plight British Human Rights Organizations and Soviet Dissent 1965 1985 examines the efforts of these activists exploring how influential their activism was in shaping the wider public awareness of Soviet human rights violations in the context of the Cold War Mark Hurst explores the British response to Soviet human rights violation drawing on extensive archival work and interviews with key individuals from the period This book examines the network of human rights activists in Britain and demonstrates that in order to be fully understood the Soviet dissident movement needs to be considered in an international context *ADAMHA News on Alcohol, Drug Abuse, and Mental Health*, 1989 *Torture and Democracy* Darius M. Rejali, 2007 This is the most comprehensive and most comprehensively chilling study of modern torture yet written Darius Rejali one of the world's leading experts on torture takes the reader from the late nineteenth century to the aftermath of Abu Ghraib from slavery and the electric chair to electrocution in American inner cities and from French and British colonial prison cells and the Spanish American War to the fields of Vietnam the wars of the Middle East and the new democracies of Latin America and Europe As Rejali traces the development and application of one torture technique after another in these settings he reaches startling conclusions As the twentieth century progressed he argues democracies not only tortured but set the international pace for torture Dictatorships may have tortured more and more indiscriminately but the United States Britain and France pioneered and exported techniques that have become the lingua franca of modern torture methods that leave no marks Under the watchful eyes of reporters and human rights activists low level authorities in the world's oldest democracies were the first to learn that to scar a victim was to advertise iniquity and invite scandal Long before the CIA even existed police and soldiers turned instead to clean techniques such as torture by electricity ice water noise drugs and stress positions As democracy and human rights spread after World War II so too did these methods Rejali makes this troubling case in fluid arresting prose and on the basis of unprecedented research conducted in multiple languages and on several continents begun years before most of us had ever heard of Osama bin Laden or Abu Ghraib The author of a major study of Iranian torture Rejali also tackles the controversial question of whether torture really works answering the new apologists for torture point by point A brave and disturbing book this is the benchmark against which all future studies of modern torture will be measured **Implementation of the Final Act of the Conference on Security and Cooperation in Europe** United States. Implementation of the Final Act of the Conference on Security and Cooperation in Europe, 1982 **Corrections,**

Mental Health, and Social Policy Robert Kirk Ax, Thomas J. Fagan, 2007 This book is well suited to readers dealing with correctional issues in today's complex global society. Given the task of providing adequate mental health care to the burgeoning U.S. prison population including those thousands with serious mental illnesses who have defaulted from the nation's disjointed mental health systems, the book provides a consideration of approaches and ideas beyond those generated in the domestic academic/practitioner community including the mental health concerns that transcend borders and national sovereignty. In this category are the treatment and management of the

Non-Aligned Psychiatry in the Cold War Ana Antić, 2022-01-18 This book explores the relationship between socialist psychiatry and political ideology during the Cold War, tracing Yugoslav psy sciences as they experienced multiple internationalisations and globalisations in the post WWII period. These unique transnational connections with West, East and South remain at the centre of this book. The author argues that the psy disciplines provide a window onto the complications of Cold War internationalism, offering an opportunity to re-think postwar Europe's internal dynamics. She tells an alternative pan-European narrative of the post 1945 period, demonstrating that in the Cold War there existed sites of collaboration and vigorous exchange between the two ideologically opposed camps and places like Yugoslavia provided a meeting point where ideas, frameworks and professional and cultural networks from both sides of the Iron Curtain could overlap and transform each other. Moreover, the book offers the first analysis of East European psychiatrists' contacts with and contributions to the decolonizing world, exploring their participation in broader political discussions about decolonization, anti-imperialism and non-alignment. The Yugoslav brand of East-West psychoanalysis and psychotherapy bred a truly unique intellectual framework which enabled psychiatrists to think through a set of political and ideological dilemmas regarding the relationship between individuals and social structures. This book offers a thorough reinterpretation of the notion of communist psychiatry as a tool used solely for political oppression and instead emphasises the political interventions of East European psychiatry and psychoanalysis. This monograph has partly been funded by the European Research Council (ERC) under the European Union's Horizon 2020 research and innovation programme (ERC Starting Grant DECOLMAD 851871).

HUMAN RIGHTS WATCH WORLD REPORT 1990: An Annual Review of Developments and the Bush Administration's Policy on Human Rights Worldwide January 1991, In the Labyrinth of the KGB Olga Bertelsen, 2022-02-15 2024 Winner Kjetil Hatlebrekke Memorial Book Prize King's College Centre for the Study of Intelligence This book focuses on the generation of the sixties and seventies in Kharkiv, Soviet Ukraine, a milieu of writers who lived through the Thaw and the processes of de-Stalinization and re-Stalinization. Special attention is paid to KGB operations against what came to be known as the dissident milieu and the interaction of Ukrainians, Jews and Russians in the movement, their persona, friendships, formal and informal interactions and the ways they dealt with repression and arrests. This study demonstrates that the KGB unintentionally facilitated the transnational and intercultural links among the Kharkiv multi-ethnic community of writers and their mutual enrichment. Post-Khrushchev Kharkiv is analyzed

as a political space and a place of state violence aimed at combating Ukrainian nationalism and Zionism two major targets in the 1960s 1970s Despite their various cultural and social backgrounds the Kharkiv literati might be identified as a distinct bohemian group possessing shared aesthetic and political values that emerged as the result of de Stalinization under Khrushchev Archival documents diaries and memoirs suggest that the 1960s 1970s was a period of intense KGB operations active measures designed to disrupt a community of intellectuals and to fragment friendships bonds and support among Ukrainians Russians and Jews along ethnic lines domestically and abroad
