**Cultural Politics and Political Culture in Postmodern Europe**, 1997-01-01 The present volume assembles essays from a broad cultural and professional spectrum around the question of European cultural identity The heterogeneity of the contributors their differing points of departure and methods attests to a tension in intellectual communities which today is more intense than ever Europe's identity crisis is not merely an empirical matter It reflects a far deeper and far older discursive crisis The mandate of Europe's traditional intellectual institutions to preserve and police their own cultural heritage has proved incapable of evolving in a manner sufficient to account for the mutation in its object European culture It is not merely that Europe's identity like any identity in the flux of history has changed Rather the notion of identity the very basis of any questions of who we are where we are going and the appropriate political forms and social institutions for further existence all rely on a logic of identity which has at best become extremely problematic It is this problematization which provides the common thread unifying the following essays Each contributor in his/her own way and with respect to his/her own research object confronts the adequacy of the concept of cultural identity The hidden presuppositions of this concept are indeed remarkable and the logic of cultural identity prescribes that they remain undisclosed

Racial Segregation and the Origins of Apartheid in South Africa, 1919-36 Saul Dubow, 1989-07-03

This analysis of the historical development of racial segregation in South Africa between the World War I and II casts light on the period immediately before the advent of modern day apartheid and provides an account of the ideological political and administrative origins of apartheid Segregation is seen here as a complex combination of ideas and policies which aimed to entrench and legitimize the basis of white domination in South Africa The authors feel that in essence it represented an attempt to uphold white supremacy by containing the powerful social forces unleashed by South Africa's rapid process of industrialization The work is based on archival research in South Africa and aims to draw upon some of the most recent scholarship

*Totalitarianism* Abbott Gleason, 1997-03-20

For more than six decades the term totalitarian was applied to everything from Franco's Spain to Stalin's Soviet Union One of the most enigmatic and yet compelling ideas of our time it has been both an almost meaningless political catcall and an indispensable concept for understanding the dictatorships that have marred the history of this century Now historian Abbott Gleason provides a fascinating account of the life of this idea Totalitarianism offers a penetrating chronicle of the central concept of our era an era shaped by our conflict first with fascism and then with communism Interweaving the story of intellectual debates with the international history of the twentieth century Gleason traces the birth of the term to Italy in the first years of Mussolini's rule Created by Mussolini's enemies the word was appropriated by the Fascists themselves to describe their program in what turned out to be one of the less totalitarian of the European dictatorships He follows the growth and expansion of the concept as it was picked up in the West and applied to Hitler's Germany and the Soviet Union Gleason's account takes us through the debates of the early postwar years as academics in turn adopted the term notably Hannah Arendt The idea of totalitarianism came to possess novelists such as Arthur Koestler *Darkness at Noon* and George Orwell whose *Nineteen Eighty Four* was interpreted by conservatives as an attack on socialism in general and subsequently suffered criticism from left leaning critics The concept fully entered the public consciousness with the opening of the Cold War as Truman used the rhetoric of totalitarianism to sell the Truman Doctrine to Congress Gleason takes a fascinating look at the notorious brainwashing episodes of the Korean War which convinced Americans that Communist China too was a totalitarian state As he takes his account through to the 1990s he offers an inner history of the Cold War revealing the political charge the term carried for writers on both the left and right He also explores the intellectual struggles that swirled around the idea in France Germany Italy Czechoslovakia and Poland When the Cold War drew to a close in the late 1980s Gleason writes the concept lost much of its importance in the West even as it flourished in Russia where writers began to describe their own collapsing state as totalitarian though left wing Western

thinkers had long resisted doing so Abbott Gleason is a leading scholar of Soviet and Russian history and a contributor to periodicals ranging from The Russian Review to The Atlantic Monthly In this stimulating intellectual history he offers a revealing look at one of the central concepts of modern times      **Totalitarianism and Political Religions Volume III** Han Maier,2008
