**The Electrification of Russia, 1880-1926** Jonathan Coopersmith, 2016-11-01 The Electrification of Russia 1880 1926 is the first full account of the widespread adoption of electricity in Russia from the beginning in the 1880s to its early years as a state technology under Soviet rule Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science based enterprise A centralized plan of electrification triumphed to the benefit of the Communist Party and the detriment of local governments and the electrical engineers Coopersmith's narrative of how this came to be elucidates the deep seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics

**The Political Economy of Soviet Socialism: the Formative Years, 1918-1928** Peter J. Boettke, 2013-03-14 This book presents a narrative of one of the more interesting utopian experiments in comparative political and economic history the first decade of the Soviet experience with socialism 1918 1928 Though historical and textual analysis the book's goal is to render this experience intelligible to get at the meaning of the Soviet experience with socialism for comparative political economy today The book examines the texts of Lenin Bukharin and other revolutionaries as well as the interpretations of contemporary historians of the revolution and the writings of more recent interpreters of Soviet political and economic history Arguing that the first three years of the Bolshevik regime 1918 1921 constitute an attempt to carry out the Marxian ideal of comprehensive central planning and that the disastrous results which all commentators agree occurred were the inevitable outcome of this Marxian ideal coming into conflict with the economic reality of the coordination problem that all economic systems face the book draws clear conclusions and elucidates the air of mystery that often surrounds the subject Offering a radical challenge to contemporary comparative political economy at the level of high theory applied research and public policy this book is appropriate for students and scholars interested in Marxism economic history political economy and Austrian economics

Soviet Tragedy Martin Malia, 2008-06-30 The Soviet Tragedy is an essential coda to the literature of Soviet studies Insofar as he returns the power of ideology to its central place in Soviet history Malia has made an enormous contribution He has written the history of a utopian illusion and the tragic consequences it had for the people of the Soviet Union and the world David Remnick The New York Review of Books In Martin Malia the Soviet Union had one of its most acute observers With this book it may well have found the cornerstone of its history Francois Furet author of Interpreting the French Revolution The Soviet Tragedy offers the most thorough scholarly analysis of the Communist phenomenon that we are likely to get for a long while to come Malia states that his narrative is intended to substantiate the basic argument and this is certainly an argumentative book which drives its thesis home with hammer blows On this breathtaking journey Malia is a witty and often brilliantly

penetrating guide He has much wisdom to impart The Times Literary Supplement This is history at the high level well deployed factually but particularly worthwhile in the philosophical and political context at once a view and an overview The Washington Post

**Comparisons of the United States and Soviet Economies** United States. Congress. Joint Economic Committee,1959 Comparisons of the United States and Soviet Economies, Supplemental Statement of Costs and Benefits to the Soviet Union of Its Bloc and Pact System United States. Congress. Economic Joint Committee,1959 History of Technology Volume 13 Graham Hollister-Short, Frank James, 2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays Volumes contain technical articles ranging widely in subject time and region as well as general papers on the history of technology In addition to dealing with the history of technical discovery and change History of Technology also explores the relations of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred A History of Russia, the Soviet Union, and Beyond David MacKenzie, Michael W. Curran, 1993 The HISTORY OF RUSSIA AND THE SOVIET UNION is a general survey of Russian history from earliest times to the present The authors present a balanced coverage of political diplomatic economic social intellectual and cultural history A History of the Soviet Union David MacKenzie, Michael W. Curran, 1990 The book provides sound and detailed information on political and diplomatic history as well as on economic social intellectual and cultural history The second edition includes more material on minority peoples and continues the full coverage of women This volume will be the most current and concise of the Soviet history texts available **Why Perestroika Failed** Peter J Boettke, 1993-01-14 This argues that Perestroika failed as the result of the lack of understanding of market and political processes with reform processes representing Popular Perceptions of Soviet Politics in the 1920s O. Velikanova, 2013-01-28 This is the first study of popular opinions in Soviet society in the 1920s These voices which made the Russian revolution characterize reactions to mobilization politics patriotic militarizing campaigns the tenth anniversary of the revolution and state attempts to unite the nation around a new Soviet identity Economic Management And Transition Towards A Market Economy: An Asian Perspective Anthony Theng Heng Chin, Hock Guan Ng, 1996-10-04 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union However a growing demand for policy advice technical assistance and expertise is also coming from Asian reforming countries such as China Mongolia Vietnam Laos and Cambodia In addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries Such developments are too important to overlook or ignore The transformation of socialist economies towards market based systems entails an unusually wide range of problems Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents Although the structural features of Asian reforming economies are in important ways different from those of the

Eastern European economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia The contributions are by no means exhaustive However they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies

*Studies On Science And The Innovation Process: Selected Works By Nathan*

*Rosenberg* Nathan Rosenberg, 2009-08-18 Science and technology have become increasingly intertwined in the twentieth century. However, little attention has been paid to the forces that have brought about this condition. Indeed, many scholars have taken it simply for granted that causality always runs from science to technology. In this groundbreaking book, Rosenberg's research suggests that history and extensive empirical evidence lead to a reality that is far more complex as well as far more interesting. Here, Rosenberg's papers explore a wide range of pertinent issues, especially those connected with the innovative process, including the realms of electric power, electronics, chemicals, aircraft, medicine, instrumentation, and in particular, higher education and the organization of research activities.
