

The Soviet Legacy

On July 13, 1944 the Soviet troops entered and occupied Vilnius, the capital of Lithuania. The rest of the country fell in a matter of a few days. The small Baltic state remained in oppression for the next five decades.

Its citizens lived through horrors difficult to even think about. They had jobs but many companies were inefficient. They could not always buy enough food for their families. Their religion was suppressed and the local language forbidden. And worst of all, their friends, family members and neighbours could be shipped to labour camps in Siberia without any notice, never to return.

Lithuania was not the only country to go through this. The Soviets took control of 15 countries by force at the end of the Second World War. Its government influenced the lives of nearly 291 million people.

It has now been 30 years since the collapse of the Union. So how are the former USSR countries doing today? Even though they have made economic and social progress, the legacy from the years of oppression is still present. In this visualisation, we explore how these countries compare to the rest of the world in terms of mental health, politics and economy.

The Politics of Bad Governance in Contemporary Russia Vladimir Gel'man, 2022-07-06 In this book Vladimir Gel'man considers bad governance as a distinctive politico economic order that is based on a set of formal and informal rules norms and practices quite different from those of good governance Some countries are governed badly intentionally because the political leaders of these countries establish and maintain rules norms and practices that serve their own self interests Gel'man considers bad governance as a primarily agency driven rather than structure induced phenomenon He addresses the issue of causes and mechanisms of bad governance in Russia and beyond from a different scholarly optics which is based on a more general rationale of state building political regime dynamics and policy making He argues that although these days bad governance is almost universally perceived as an anomaly at least in developed countries in fact human history is largely a history of ineffective and corrupt governments while the rule of law and decent state regulatory quality are relatively recent matters of modern history when they emerged as side effects of state building Indeed the picture is quite the opposite bad governance is the norm while good governance is an exception The problem is that most rulers especially if their time horizons are short and the external constraints on their behavior are not especially binding tend to govern their domains in a predatory way because of the prevalence of short term over long term incentives Contemporary Russia may be considered as a prime example of this phenomenon Using an analysis of case studies of political and policy changes in Russia after the Soviet collapse Gel'man discusses the logic of building and maintaining the politico economic order of bad governance in Russia and paths of its possible transformation in a theoretical and comparative perspective

Authoritarian Regionalism in the World of International Organizations Anastassia V. Obydenkova, Alexander Libman, 2019-05-02 The interconnection between international organizations IOs membership and democratization has become a topic of intense debate However the main focus of the literature so far has been on IOs created by democratic states and comprised mostly of democracies for examples the European Union In contrast to existing studies this book focuses on another group of regional IOs referred to as non democratic IOs which are organizations founded by autocracies How do these newly emerged organizations interrelate and interact with the outside world How do they counteract and confront the danger of democratization in their own member states and neighboring states This book aims to address these questions by developing a new theory of authoritarian regionalism and by combining both quantitative and qualitative analysis to test it The quantitative analysis uses a large dataset of all regional organizations worldwide for the post World War II period with the aim of defining historical trends in development and the modification of regionalism over the last seven decades 1945 2015 Qualitative analysis refines and

develops the argument by looking at the case of post Soviet Eurasia The book uncovers a new type of regionalism authoritarian regionalism and traces its historical roots as well as its implications for modern politics The book is the first attempt to systematically investigate the functioning and the impact of authoritarian regionalism as a new phenomenon as well as its implications for democratization world wide The book contributes to the theory of regionalism international organizations studies of autocracies foreign policy and democratization world wide Women's Imprisonment in Eastern Europe Arta Jalili Idrissi, 2023-11-16 The first qualitative study based on an ethnographic approach to women's carceral experiences in Latvia this book draws parallels across Eastern Europe and throughout the neoliberal West to provide a refreshing and timely addition to the study of criminology and the sociology of imprisonment
