this work two senior naval historians analyze the discussions held in leading Soviet political military and naval circles concerning naval strategy and the decisions taken for warship building programmes They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid 1920s leading to a change from classical naval strategy to a Jeune école model in the first two Five Year Plans including efforts to obtain foreign assistance in the design of warships and submarines Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean going fleet After a period of co operation with Germany from 1939 41 the plans came to a halt when Hitler attacked the Soviet Union in 1941 Finally this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin the party and government officials about the direction of the new building programmes as the Cold War began *Exercising Control of the Sea* Milan Vego, 2020-10-14 This book explains both the strategic and the operational aspects of exercising control of the sea The struggle for sea control consists of three mutually related and overlapping phases obtaining maintaining and exercising sea control It is in the phase of exercising sea control when one's strategic or operational success is exploited otherwise the fruits of victories achieved would be wasted This work describes the strategy of a stronger side in wartime after a desired degree of control has been obtained which is followed by a discussion on the objectives and main methods used in exercising sea control The remaining chapters explain and analyze in some detail each of the main methods of exercising sea control defence and protection of one's own and destruction neutralization of the enemy's military economic potential at sea capturing the enemy's operationally important positions ashore destroying weakening the enemy's military economic potential ashore and supporting one's ground forces in their offensive and defensive operations on the coast This book will be of much interest to students of strategic studies sea power

and naval history The Military History of the Soviet Union F. Kagan,R. Higham,2016-04-30 The Military History of the Soviet Union and The Military History of Tsarist Russia treat Russian military history from the rise of the Muscovite state to the present even peeking briefly into the future The two volumes will cover Russia s land forces extensively but will also cover the development of the Russian Navy and the creation and development of the Russian Air Force parts of the Russian military machine which are frequently neglected in general writings The historical analysis will address the development and function of the Russian military whether in peace or in war as well as the impact of war and changes in the military upon Russian society and politics **European Navies and the Conduct of War** Carlos Alfaro-Zaforteza,Alan James,Malcolm H Murfett,2018-07-17 European Navies and the Conduct of War considers the different contexts within which European navies operated over a period of 500 years culminating in World War Two the greatest war ever fought at sea Taking a predominantly continental point of view the book moves away from the typically British centric approach taken to naval history as it considers the role of European navies in the development of modern warfare from its medieval origins to the large scale industrial total war of the twentieth century Along with this growth of navies as instruments of war the book also explores the long rise of the political and popular appeal of navies from the princes of late medieval Europe to the enthusiastic crowds that greeted the modern fleets of the great powers followed by their reassessment through their great trial by combat firmly placing the development of modern navies into the broader history of the period Chronological in structure European Navies and the Conduct of War is an ideal resource for students and scholars of naval and military history **Hitler's War in the East, 1941-1945** Rolf-Dieter Müller,Gerd R. Ueberschär,2002 Provides a guide to the extensive literature on the war in the East including largely unknown Soviet writing on the subject Sections on policy and strategy the military campaign the ideologically motivated war of annihilation in the East the occupation and coming to terms with the results of the war offer a wealth of bibliographic citations and include introductions detailing history of the period and related issues For military historians and for scholars who approach this period in history from a socio economic or cultural perspective No index Annotation copyrighted by Book News Inc Portland OR *The Future Of The Soviet Navy* Bruce W. Watson,Peter M Dunn,2020-01-28 The efforts of the Soviet Union since the mid 1950s to develop naval power have produced one of the strongest navies in the world but this achievement has not been without serious costs The construction of increasingly complex submarines ships and aircraft has required greater investment of resources and manpower This volume addresses whether the Soviet Union will continue naval expansion and what directions technological development will take in the future In particular the contributors consider trends in submarine aircraft carrier and surface combatant systems and examine what implications these developments have for U S defense planning over the next two decades **Maritime Strategy and Sea Denial** Milan Vego,2018-12-07 This book focuses on the theory and practice of maritime strategy and operations by the weaker powers at sea Illustrated by examples from naval and military history the book

explains and analyzes the strategies of the weaker side at sea in both peacetime and wartime in defense versus offense the main prerequisites for disputing control of the sea and the conceptual framework of disputing control of the sea It also explains and analyzes in some detail the main methods of disputing sea control avoiding seeking decisive encounters weakening enemy naval forces over time counter containment of enemy naval forces destroying the enemy s military economic potential at sea attacks on the enemy coast defense of the coast defense capturing important positions basing areas and defense capturing of a choke point A majority of the world s navies are currently of small or medium size In the case of a war with a much stronger opponent they would be strategically on the defensive and their main objective then would be to dispute control of the sea by a stronger side at sea This book provides a practical guide to such a strategy This book would be of much interest to students of naval power maritime security strategic studies and military naval history World War II at Sea Spencer C. Rose,2007 Volume 1 Traces the social issues technological advances and combative encounters of the international naval race from 1890 through WWI as the largest industrial nations U S Great Britain Japan and Germany scrambled to secure global markets and empire using their battleship navies as pawns of power politics Provided by publisher *The Kuban 1943* Robert Forczyk,2018-02-22 In the summer of 1942 the Wehrmacht invaded the Caucasus in order to overrun critical oil production facilities at Maikop Grozny and Baku However the Red Army stopped the Germans short of their objectives and then launched a devastating winter counteroffensive that encircled them at Stalingrad Consequently Hitler grudgingly ordered an evacuation from the Caucasus but ordered 17 Armee to fortify the Kuban bridgehead and hold it at all costs in order to leave open the possibility of future offensives On the other side the Soviet Stavka ordered the North Caucasus Front and the Black Sea Fleet to eliminate the Kuban bridgehead as soon as possible The stage was set for a contest between an immovable object and an unstoppable force With the help of stunning specially commissioned artwork this book tells the

enthraling story of the impressive but strategically foolish German stand at Kuban which tied down seven Soviet armies in a sideshow battle of attrition which the Soviets dubbed the Kuban meat grinder
